SIX-WHEEL
DRIVE

John Deere Motor Grader

672D

185 net hp
33,630-lb. SAE operating weight
39,410-lb. typically equipped
42,120-lb. blade pull

Superior grades.

John Deere's D-Series Graders are the best six-wheel-drive graders you can run. How can we be so certain? Because they've proven themselves in a wide variety of applications throughout North America. Designed with extensive input from owners and veteran operators and further refined

by their ongoing feedback, this veteran lineup delivers unsurpassed comfort, control, speed, and operating ease. Packed with best-in-class productivity-boosting features such as our patented EBS transmission, the D-Series will help you achieve better grades, too. To learn more, read on.

872D

245 net hp
36,210-lb. SAE operating weight
42,240-lb. typically equipped
43,760-lb. blade pull

772D

230 net hp
34,280-lb. SAE operating weight
40,790-lb. typically equipped
43,200-lb. blade pull

Innovative Event-Based Shifting (EBS) transmission senses the load while automatically adjusting clutch-pack engagement, for the smoothest shifting transmission in any grader. There's nothing else like it.

The dual-path hydrostatic front-wheel-drive system provides exceptional control and responsiveness — and more power to the ground to move more material.

Fuel-efficient Tier 2-certified PowerTech™ Deere engines deliver impressive torque rise and peak torque for best-in-class low-rpm pull-through power.

Moldboard shape, throat clearance, and draft-frame geometry enhancements improve material flow across the blade.

Familiar low-effort levers command a Pressure-Compensated Load-Sensing (PCLS) hydraulic system for precise, predictable response and fine-grading control when blue topping.

A yellow John Deere 672D grader is shown from a low-angle perspective, driving on a dirt road. The machine is equipped with large, treaded tires and a front-mounted blade. The operator is visible in the cab, wearing a hard hat. The background features a desert landscape with sparse vegetation and hills under a clear sky. The text "JOHN DEERE" is visible on the side of the cab, and "672D" is printed on the front fender.

Grounds for a Deere 6WD Grader.

Some think six-wheel drive is only for poor underfoot conditions. That may be true of other graders. But the many advantages of Deere's best-in-class

dual-path hydrostatic front-wheel-drive system extend far beyond just foul-weather work. Your operators will enjoy plenty of everyday benefits, as well.

Six-wheel drive puts the entire machine's weight to work, making the 672D, 772D, and 872D Graders more productive in all kinds of applications, including fine grading.

These six-wheelers do almost everything easier and with fewer passes than their conventional counterparts.

Separate pumps, motors, and sensors on each side ensure that one wheel doesn't rob power from the other.

Exclusive horsepower-management system balances the demand between the front and rear wheels, optimizing six-wheel-drive power and control.

1. If traction and speed are what you need, choose a 772D or 872D and get six-wheel drive through 7th gear and 18 mph.

2. Six-wheel drive lets these graders work across steep slopes, carry big loads through corners, and direct the front wheels while ditching without spinning out.

3. Power is nothing without control. Exclusive horsepower-management system and EBS provide smooth, modulated six-wheel drive to a crawl — making the D-Series equally adept at finishing.

1

3

2

With numerous overhead compartments, plus a place for a beverage, cooler, and cell phone, there's no shortage of storage space.

Enhanced HVAC system moves 64 percent more air and provides 27 percent better cooling. Thirteen directional vents help keep the cab comfortable and the view clear — eliminating the need for noisy bus fans.

Tightly sealed, isolation-mounted ROPS cab provides best-in-class quietness to help reduce fatigue. Enables you to hear the radio or CD player, too.

Extended roofline and adjustable front and back shades reduce sun glare. Front and rear intermittent wipers and rear window defogger are standard; heated mirrors are available.

Additional halogen work lights and a high-amp alternator provide better illumination of the entire work area. Highly reliable, energy-efficient LED brake and turn-signal bulbs are standard equipment.

Optional deluxe air-suspension armchair adjusts multiple ways and provides maximum cushioning for daylong comfort and support.

1. Self-cleaning slip-resistant steps, ergonomically placed grab bars, and wide entryways ease cab entrance and exit.

2. Fully adjustable console lets an operator position the control levers and steering wheel where they're most comfortable. Moves out of the way for more walk-through room.

3. Available swing-out front windows and sliding side glass enhance ventilation inside and enable easier communication outside.

4. Advanced multi-language monitor with LCD display, analog gauges, and LED indicators provides vital operating info at a glance.

5. Standard 15-amp converter and two outlets provide plenty of power for cell phones and other electronic devices. A 30-amp converter is also available.

No pain. More gain.

While some blades are too close for comfort, the D-Series' completely rethought ROPS cabs won't cramp an operator's style. With 26 percent more interior space

than before, generous storage, and a more efficient HVAC system, comfort and convenience have been noticeably enhanced. For more gain without the pain.

A close-up, high-angle photograph of the operator's cab and control panel of a John Deere D-Series Grader. The image shows the steering wheel, various gauges, and the John Deere logo on the control panel. The background is a bright, overcast sky. The text 'Put maximum productivity within reach.' is overlaid in large, white, bold letters with a black outline.

Put maximum productivity within reach.

If you're trying to get a better handle on productivity, get your operator into the spacious cab of a D-Series Grader. With 40 percent more glass than before, all-around visibility is unsurpassed. Familiar low-effort controls combine with

PCLS hydraulics to ensure consistently precise and predictable response. To top it off (when you're topping it off), EBS delivers fully modulated shifts from one gear to another, for smooth-as-silk speed and direction changes with less effort.

Floor-to-ceiling tinted front glass yields a commanding view of the blade heel and toe, back of the cutting edge, and front tires.

With five true working speeds below 9.3 mph, and a top speed of 25 mph, it's easy to match ground speed to the work.

Available in gears 1–3, infinitely adjustable Precision Mode lets you grade as slow as ¼ mph.

Fewer lock-to-lock turns reduce arm motion while providing just the right amount of steering response and control.

EBS provides extremely smooth direction changes without engaging the inching pedal.

Pushbutton-activated cruise control helps reduce operator fatigue. Simply tap the brake or depress the throttle to return to manual operation.

Low-effort industry-standard controls deliver familiar, consistent response and all-day comfort.

1. Although EBS makes it virtually unnecessary, the low-effort inching pedal gives additional control.

2. Controls enable an operator to precisely match machine performance to the application and ground conditions. Fifteen-position rotary dial fine-tunes front-wheel speed and aggressiveness.

3. Backlit pushbuttons give convenient fingertip control of the saddle lock, lights, window washers and wipers, and window and mirror defrosters.

Sealed transmission electrical connectors prevent moisture and contaminants from entering terminals.

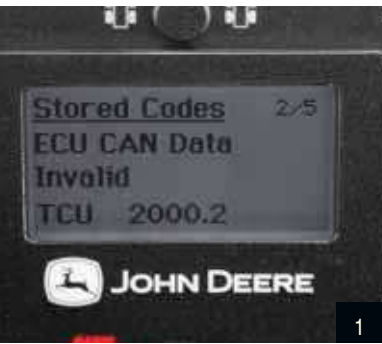

Self-adjusting wet-disc brakes are mounted inboard, where they run cool, clean, and unexposed to corrosive materials. Unlike air systems, they require virtually no maintenance.

Deere-built PowerShift™ transmission employs more durable heavy-duty clutches and bearings, for reliable performance, shift after shift.

Separate transmission, hydraulic, and axle filtration and cooling systems prevent cross-contamination for longer component life.

Blade is pre-stressed using a patented process for exceptional strength and durability.

Electrical-distribution center employs extremely reliable circuit-board technology and solid-state switches, reducing the number of wires and connectors from 72 to 5.

1

1. Enhanced monitor stores codes and gives diagnostic readings of most sensors and switches for quicker and easier troubleshooting.

2

2. Multifunction touch pad is sealed from dirt and moisture, and proven to endure over two million cycles.

3

3. Seven-fin-per-inch radiator and eight-fin-per-inch coolers are mounted side-by-side for efficient cooling and simplified cleanout.

4

4. High-strength circle and draft frame are built to withstand high-impact loads. Optional blade-impact system protects structural components from damage caused by run-ins with obstructions.

Nothing runs like a Deere, because nothing is built like one.

Downtime is lost time. That's why every D-Series Grader is built with traditional John Deere durability and reliability features such as a high-strength mainframe, heavy-duty wet-sleeve engine, and inboard-mounted self-adjusting wet-disc brakes. Add to those

state-of-the-art advances such as a solid-state electrical-distribution center, sealed touch pad, and multifunction diagnostic monitor, and you've got a grader that's got what it takes to keep on keeping on. When you know how they're built, you'll run a Deere.

A cut above.

The D-Series' blade/tilt frame geometry significantly enhances fine-grading ability. Optimally positioned pitch and ball-and-socket draft-frame pivots make on-the-go grading adjustments easy. Moldboard curvature and generous throat clearance help move big loads quickly. Combined

with best-in-class visibility, controls, and job-proven six-wheel drive, these graders set the standard for simpler, more precise, and less costly grade work. Ask your dealer for a demo and find out for yourself why seasoned pros have rated the D-Series a cut above the rest.

Long wheelbase provides additional balance and stability, for more accurate grading and a smoother ride without sacrificing the D-Series' tight turning radius.

Ball-and-socket draft-frame pivot has been raised, enabling easier on-the-go blade and circle adjustments for more confidence and control when blue topping.

These six-wheel-drive graders pack more power and weight, enabling them to deliver 35 percent more blade pull for larger loads and extra productivity.

Enhanced moldboard curvature and increased circle torque move more material for faster cycle times.

1. Circle motor's forward position keeps pinion teeth in constant mesh with the circle, minimizing backlash and wear.
2. With the optional IGC package, your grader arrives from the factory with the integrated connectivity needed to easily add the electronic grade control system of your choice.
3. Exclusive ball-and-socket draft-frame pivot and seven-position saddle provide superior blade reach outside the tires.
4. Acquiring a new grader? You don't have to give up your mid-mount scarifier. Heavy-duty V-shape design of this new option provides superior ground penetration.

1

2

4

3

Large service doors swing open wide, and daily service points are conveniently grouped on the same side for quick and convenient ground-level access.

Remote diagnostic and fluid sample ports enable technicians to do preventative maintenance and troubleshoot problems more quickly.

Easily accessible vertical engine, transmission, and hydraulic filters, plus environmentally friendly drains, simplify fluid changes.

You won't find any air tanks to bleed on a John Deere grader. Inboard wet-disc brakes are virtually maintenance free.

Sight gauges are conveniently located and easy to read, so you can check fluid levels at a glance.

The bucks stop here.

Just like you, we're always looking for ways to reduce your daily operating costs. So we loaded up the D-Series with uptime-enhancing features such as extended service intervals, remote test ports, and designed-in diagnostics. Large service doors open wide

for easy maintenance access, and same-side service points make quick work of the daily routine. These and other timesaving features such as easy-to-replace wear inserts, quick-change filters, and conveniently located sight gauges help keep costs under control.

1. Lockable compartments swing open for convenient ground-level access to maintenance-free batteries.
2. Moldboard employs a self-cleaning sideshift rail with easily replaced bronze wear inserts that eliminate component wear and greasing.
3. Greasing is less messy, with centralized lube banks providing easy access to difficult-to-reach zerks.
4. Five-hundred-hour engine oil and filter intervals further reduce the downtime scheduled for routine maintenance. Vertical filters allow quick, no-spill changes.
5. Unlike other graders that require far more effort and expertise, D-Series' circle wear inserts require only two hours and a 9/16-inch wrench to replace.
6. Easily replaceable super-tough nylon or bronze draft frame and circle wear inserts minimize component wear and never need greasing.

Specifications

Engine 672D

Type	John Deere PowerTech™ 6068H; certified to EPA Tier 2 emissions
Rated Speed	2,000 rpm
Engine Power	
Gears 1–4 (6WD on)	165 net hp (123 kW)
Gear 5 (6WD off)	165 net hp (123 kW)
Gears 6–8 (6WD off)	185 net hp (138 kW)
Aspiration	turbocharged with air-to-air aftercooler
Number of Cylinders	6
Displacement	414 cu. in. (6.8 L)
Net Torque @ 1,000 rpm	
Gears 1–2 (6WD off)	554 lb.-ft. (751 Nm) @ 46% net torque rise
Gears 1–4 (6WD on)	611 lb.-ft. (828 Nm) @ 41% net torque rise
Gears 3–5 (6WD off)	611 lb.-ft. (828 Nm) @ 41% net torque rise
Gears 6–8 (6WD off)	625 lb.-ft. (847 Nm) @ 64% net torque rise
Lubrication	pressure system with full-flow filter and cooler
Air Cleaner with Restriction Indicator	dual element, dry, with tangential unloader
Electrical System	24 volt with 100-amp alternator
Batteries (two 12 volt)	1,400 cold-cranking amps, 440-min. reserve capacity

Steering and Articulation

All-hydraulic power frame articulation for maneuverability and productivity; crab steering reduces side drift, positions tandems on firm ground, and increases side slope stability

Articulation (both left and right)	22 degrees
Turning Radius (front steer plus articulation) . . .	23 ft. 6 in. (7.16 m)
Front Wheel Lean	20 degrees

Six-Wheel Drive

Automatic dual path; increases tractive effort and front-end control; includes separate left and right systems with variable-displacement pumps, axial piston wheel motors, free wheel at transport speeds, operator-selectable 15-position rotary aggressiveness control, inching capability down to 0 mph, and on/off control

Conventional Mode Effective Gears	1–4 forward and reverse
Precision Mode	
Effective Gears	1–3 forward only
Effective Speeds	0.25–5.0 mph (0.4–8.0 km/h)
Hydrostatic Pumps (2)	3.9 cu. in. (64 cm ³) each
Wheel Motors	3.7 cu. in. (60 cm ³)
Final Reduction	38.7:1

Tires and Rims

Tire Size	<i>Front</i>	<i>Rear</i>
13.00-24 on 9-in. (229 mm) Rim		
Wheel Tread (on ground)	82 in. (2.08 m)	82 in. (2.08 m)
Overall Width (top of tires)	97 in. (2.46 m)	97 in. (2.46 m)
Ground Clearance (front axle)	22 in. (559 mm)	
14.00-24 on 10-in. (254 mm) Rim		
Wheel Tread (on ground)	82 in. (2.08 m)	82 in. (2.08 m)
Overall Width (top of tires)	98 in. (2.49 m)	98 in. (2.49 m)
Ground Clearance (front axle)	23.1 in. (587 mm)	
17.5-25 on 14-in. (356 mm) Rim		
Wheel Tread (on ground)	85 in. (2.16 m)	85 in. (2.16 m)
Overall Width (top of tires)	104 in. (2.64 m)	104 in. (2.64 m)
Ground Clearance (front axle)	23.1 in. (587 mm)	

Productivity

Blade Pull @ Maximum Weight and 0.9	
Coefficient of Traction	42,120 lb. (19 105 kg)

Operating Weights

672D

SAE Operating Weights With Standard Equipment	
Front	9,610 lb. (4358 kg)
Rear	24,020 lb. (10 895 kg)
Total	33,630 lb. (15 254 kg)
Typical Operating Weights with Front Push Block and Ripper	
Front	10,840 lb. (4917 kg)
Rear	28,570 lb. (13 041 kg)
Total	39,410 lb. (17 876 kg)
Maximum Operating Weight (total)	46,800 lb. (21 228 kg)

Transmission

Type	direct-drive John Deere PowerShift Plus™, modulated shift on-the-go, Event-Based Shifting (EBS), inching pedal
Travel Speeds (with no tire slip)	<i>Forward and reverse @ 2,000 rpm with 14.00-R24 tires</i>
Shift Lever Position 1	2.2 mph (3.4 km/h)
Shift Lever Position 2	3.0 mph (4.9 km/h)
Shift Lever Position 3	4.3 mph (6.8 km/h)
Shift Lever Position 4	6.0 mph (9.6 km/h)
Shift Lever Position 5	9.0 mph (14.4 km/h)
Shift Lever Position 6	12.7 mph (20.3 km/h)
Shift Lever Position 7	17.7 mph (28.4 km/h)
Shift Lever Position 8	25.0 mph (40.0 km/h)

Final Drives

Spiral bevel differential, inboard-mounted planetary sealed in cooled, filtered oil; operator-controlled differential lock/unlock; 2-in. (51 mm) pitch tandem drive chains

Front Axle

Heavy-duty, welded box construction	
Oscillation (total)	32 degrees
Wheel Lean (each direction)	20 degrees

Brakes

Foot-controlled, hydraulically operated, multiple wet-disc brakes sealed in cooled, filtered oil; self adjusting, maintenance free; includes spring-applied, hydraulically released parking brake; both independent braking systems effective on all four tandem wheels

Hydraulic System

Type	closed center, pressure compensated load sensing (PCLS), variable-displacement piston pump, O-ring face seal fittings
Hydraulic Pump	5.5 cu. in. (90 cm ³)
Rated Flow @ 2,000 rpm	54.7 gpm (207 L/min.)
Maximum System Pressure	2,750 psi

Blade Function

All-hydraulic, industry preferred hand-lever placement of blade-function controls; includes float position; easy conversion from two-hand to one-hand blade-lift control; seven blade-lift arm positions

Blade Range	
Lift Above Ground	18.5 in. (470 mm)
Blade Side Shift, Right or Left	26.9 in. (680 mm)
Shoulder Reach Outside Wheels (Frame Straight)	
Right	82 in. (2.08 m)
Left	82.5 in. (2.10 m)
Pitch at Ground Line	42 degrees forward / 5 degrees back

ROPS

Low-profile cab, full-height cab, and canopy ROPS (Rollover Protective Structure) meet criteria within SAE J1040MAY 1994, ISO 3471-1997, SAE J397MAY1994, and ISO 3164

Mainframe

Type	welded box construction
Width, Minimum	12.07 in. (306.5 mm)
Height, Minimum	10.63 in. (270 mm)
Thickness	
Sides	0.63 in. (16 mm)
Top and Bottom	1 in. (25 mm)
Weight per ft., Minimum	116.5 lb./ft. (173.7 kg/m)
Minimum Vertical Section Modulus	113.5 cu. in. (1860 cm ³)
Average Vertical Section Modulus at Saddle	157 cu. in. (2572 cm ³)

Draft Frame

Welded box construction machined for flatness with double ball-and-socket pivot connection, equipped with replaceable wear inserts

Circle 672D

Type	welded construction, heat treated for strength, machined for flatness, equipped with replaceable wear inserts
Circle Diameter	60 in. (1.52 m)
Rotation	360 degrees
Drive	hydraulic motor and worm gear with positive lock
Side Shift	
Right	28.5 in. (724 mm)
Left	31 in. (787 mm)

Moldboard

Type	high-strength, pre-stressed, wear-resistant, high-carbon steel, equipped with replaceable side-shift wear inserts
Length	12 ft. 0 in. (3.66 m)
Height	24 in. (610 mm)
Thickness	0.88 in. (22 mm)

Cutting Edge

Type	Dura-Max® through-hardened steel edge
Thickness and Width	0.62 x 6 in. (16 x 152 mm)

Scarifiers

	<i>front</i>	<i>mid-mount</i>
Type	V-type manual two-pitch position with hydraulic float	V-type manual three-pitch position with hydraulic float
Width of Cut	48 in. (1.20 m)	46.6 in. (1.18 m)
Number of Teeth	5 standard, can hold up to 9	11
Shank Spacing	5.75 in. (146 mm)	4.6 in. (117 mm)
Lift Above Ground	21.8 in. (554 mm)	13 in. (330 mm)
Maximum Penetration	13.3 in. (338 mm)	11.5 in. (292 mm)
Shank Size	1 x 3 in. (25 x 76 mm)	1 x 3 in. (25 x 76 mm)

Rear Ripper / Scarifier

	<i>parallelogram linkage with manual valve control and hydraulic float, tool bar for five ripper and nine scarifier shanks</i>	<i>scarifier</i>
Type		
Width of Cut	87 in. (2.21 m)	87 in. (2.21 m)
Number of Shanks	3 standard, can hold up to 5	can hold up to 9
Lift Above Ground	21.4 in. (544 mm)	26.8 in. (681 mm)
Maximum Penetration	18 in. (457 mm)	12.7 in. (323 mm)
Shank Size	2.25 x 5.5 in. (57 x 140 mm)	1 x 3 in. (25 x 76 mm)

Capacities (U.S.)

Fuel Tank	106 gal. (401.2 L)	Differential Housing	9.5 gal. (36 L)
Cooling System	12 gal. (45.4 L)	Tandem Housings (each)	20 gal. (75.7 L)
Engine Lubrication, Including Filter	6.25 gal. (23.7 L)	Circle Gearbox	1.5 gal. (5.7 L)
Transmission	6 gal. (22.7 L)	Hydraulic Reservoir	14 gal. (53 L)

Dimensions

A Height to Top of Blade-Lift Cylinders	116 in. (2.95 m)	F Wheelbase	20 ft. 1 in. (6.12 m)
B Height to Top of Exhaust	122 in. (3.10 m)	G Overall Length	346.7 in. (8804 mm)
C Height to Top of Cab*	10 ft. 5 in. (3.18 m)	H Overall Length with Scarifier	375.4 in. (9534 mm)
D Blade Base	101.1 in. (2568 mm)	I Overall Length with Scarifier and Ripper	405.7 in. (10 304 mm)
E Tandem Axle Spacing	60.8 in. (1.54 m)		*Add 8.9 in. (225 mm) for full-height cab.

**Optional or Special Equipment
With Approximate Weights**

672D

Add these weights to SAE standard equipment operating weight to obtain total operating weight.

Coolant Heater	8 lb. (4 kg)
Rotary Ejector Pre cleaner	17 lb. (8 kg)
Lighting Packages with LED Colored Lights	
Grading (10 halogen lights): Transportation Lights Plus Mid-Frame (2), Under Cab (2), and Backup Reverse Lights (2)	8 lb. (4 kg)
Deluxe Grading (16 halogen lights): Grading Lights Plus Front Roof Inner (2), Front Roof Outer (2), and Rear Roof Lights (2)	17 lb. (8 kg)
Deluxe Grading Lights with Additional Right-Side Cab Roof Lights (2) (18 halogen lights): Deluxe Grading Lights Plus Rear Right-Side Roof Lights (2)	20 lb. (9 kg)
High-Front Light Bar for Snowplowing	44 lb. (20 kg)
24- to 12-Volt 30-Amp Converter	3 lb. (1 kg)
Auxiliary Hydraulic Control Valve Section and Controls (optional valves are available for attachments such as rear ripper, front-mounted scarifier, and snow equipment; see dealer price list for details)	
Hydraulics for Front-Mounted Equipment	19 lb. (9 kg)
Moldboards with Through-Hardened Dura-Max® Cutting Edge	
12 ft. x 24 in. x 7/8 in. with 8-in. x 3/4-in. cutting edge	100 lb. (45 kg)
12 ft. x 27 in. x 1 in. with 8-in. x 3/4-in. cutting edge	277 lb. (126 kg)
13 ft. x 27 in. x 1 in. with 8-in. x 3/4-in. cutting edge	396 lb. (180 kg)
14 ft. x 24 in. x 7/8 in. with 6-in. x 5/8-in. cutting edge	231 lb. (105 kg)
14 ft. x 24 in. x 7/8 in. with 8-in. x 3/4-in. cutting edge	346 lb. (157 kg)
Extensions, 2 ft. (610 mm), Right or Left (less cutting edge)	
For Use with 24-in. Moldboards	218 lb. (99 kg)
For Use with 27-in. Moldboards	228 lb. (103 kg)
Overlay End Bits, Reversible (one pair)	
For 6-in. (152 mm) Cutting Edge	42 lb. (19 kg)
For 8-in. (203 mm) Cutting Edge	50 lb. (23 kg)
Extended Wear Moldboard Side-Shift Wear Inserts	8 lb. (4 kg)
Extended Wear Circle Wear Inserts	43 lb. (20 kg)
Bottom Guard, Heavy Duty with Side Guards	391 lb. (177 kg)
Front Weight	550 lb. (249 kg)
Push Block	
Front (standard)	1,500 lb. (682 kg)
Front (heavy)	2,000 lb. (909 kg)
Rear Hitch	50 lb. (23 kg)
Ripper/Scarifier, Rear Mounted with Hitch and Ripper Shanks (3)	3,000 lb. (1361 kg)
Scarifier, Front Mounted with Teeth (5)	1,874 lb. (850 kg)
Scarifier, Mid-Mount with Teeth (11)	2,662 lb. (1208 kg)
Tires	
13.00-24, 12 PR G2	– 558 lb. (– 253 kg)
14.00-24, 12 PR G2	– 474 lb. (– 215 kg)
17.5-25, 12 PR G2	– 210 lb. (– 95 kg)
14.00-R24, Radial, G2 General Purpose	0 lb. (0 kg)

Air Cleaner with Restriction Indicator	dual element, dry, with tangential unloader	
Electrical System	24 volt with 100-amp alternator	
Batteries (two 12 volt)	1,400 cold-cranking amps, 440-min. reserve capacity	

Steering and Articulation

All-hydraulic power frame articulation for maneuverability and productivity; crab steering reduces side drift, positions tandems on firm ground, and increases side slope stability

Front steer plus articulated

Articulation (both left and right)	22 degrees
Turning Radius (front steer plus articulation)	23 ft. 6 in. (7.16 m)
Front Wheel Lean	20 degrees

Six-Wheel Drive

Automatic dual path; increases tractive effort and front-end control; includes separate left and right systems with variable-displacement pumps, axial piston wheel motors, free wheel at transport speeds, operator-selectable 15-position rotary aggressiveness control, inching capability down to 0 mph, and on/off control

Conventional Mode Effective Gears	1–7 forward and reverse
Precision Mode	
Effective Gears	1–3 forward only
Effective Speeds	0.25–5.0 mph (0.4–8.0 km/h)
Hydrostatic Pumps (2)	3.9 cu. in. (64 cm³) each
Wheel Motors, Variable Displacement	1.2 to 3.7 cu. in. (20 to 60 cm³)
Final Reduction	38.7:1

Tires and Rims

Tire Size	Front	Rear
14.00-24 on 10-in. (254 mm) Rim		
Wheel Tread (on ground)	82 in. (2.08 m)	82 in. (2.08 m)
Overall Width (top of tires)	99 in. (2.51 m)	98 in. (2.49 m)
Ground Clearance (front axle)	23.1 in. (587 mm)	
17.5-25 on 14-in. (356 mm) Rim		
Wheel Tread (on ground)	85 in. (2.16 m)	85 in. (2.16 m)
Overall Width (top of tires)	104 in. (2.64 m)	104 in. (2.64 m)
Ground Clearance (front axle)	23.1 in. (587 mm)	

Productivity

Blade Pull @ Maximum Weight and 0.9	
Coefficient of Traction	43,200 lb. (19 595 kg)

Operating Weights

772D

SAE Operating Weights With Standard Equipment

Front	9,620 lb. (4364 kg)
Rear	24,660 lb. (11 186 kg)
Total	34,280 lb. (15 549 kg)

Typical Operating Weights with Front Push

Block and Ripper	
Front	11,160 lb. (5062 kg)
Rear	29,630 lb. (13 440 kg)
Total	40,790 lb. (18 502 kg)

Maximum Operating Weight (snow equipment)

Rear	32,160 lb. (14 587 kg)
Total	48,000 lb. (21 772 kg)

Transmission

Type direct-drive John Deere PowerShift Plus™, modulated shift on-the-go, Event-Based Shifting (EBS), inching pedal

Travel Speeds (with no tire slip) *Forward and reverse @ 2,000 rpm with 14.00-R24 tires*

Shift Lever Position 1	2.3 mph (3.6 km/h)
Shift Lever Position 2	3.2 mph (5.1 km/h)
Shift Lever Position 3	4.4 mph (7.1 km/h)
Shift Lever Position 4	6.3 mph (10.0 km/h)
Shift Lever Position 5	9.4 mph (15.0 km/h)
Shift Lever Position 6	13.2 mph (21.1 km/h)
Shift Lever Position 7	18.5 mph (29.5 km/h)
Shift Lever Position 8	26.0 mph (41.6 km/h)

Final Drives

Spiral bevel differential, inboard-mounted planetary sealed in cooled, filtered oil; operator-controlled differential lock/unlock; 2-in. (51 mm) pitch tandem drive chains

Front Axle

Heavy-duty, welded box construction

Oscillation (total) 32 degrees

Wheel Lean (each direction) 20 degrees

Brakes

Foot-controlled, hydraulically operated, multiple wet-disc brakes sealed in cooled, filtered oil; self adjusting, maintenance free; includes spring-applied, hydraulically released parking brake; both independent braking systems effective on all four tandem wheels

Hydraulic System

Type closed center, pressure compensated load sensing (PCLS), variable-displacement piston pump, O-ring face seal fittings

Hydraulic Pump 5.5 cu. in. (90 cm³)

Rated Flow @ 2,000 rpm 54.7 gpm (207 L/min.)

Maximum System Pressure 2,750 psi

Blade Function

All-hydraulic, industry preferred hand-lever placement of blade-function controls; includes float position; easy conversion from two-hand to one-hand blade-lift control; seven blade-lift arm positions

Blade Range

Lift Above Ground 18.5 in. (470 mm)

Blade Side Shift, Right or Left 26.9 in. (680 mm)

Shoulder Reach Outside Wheels (Frame

Straight)

Right 82 in. (2.08 m)

Left 82.5 in. (2.10 m)

Pitch at Ground Line 42 degrees forward / 5 degrees back

ROPS

Low-profile cab, full-height cab, and canopy ROPS (Rollover Protective Structure) meet criteria within SAE J1040MAY 1994, ISO 3471-1997, SAE J397MAY1994, and ISO 3164

Mainframe

Type welded box construction

Width, Minimum 12.07 in. (306.5 mm)

Height, Minimum 10.63 in. (270 mm)

Thickness

Sides 0.63 in. (16 mm)

Top and Bottom 1 in. (25 mm)

Weight per ft., Minimum 116.5 lb./ft. (173.7 kg/m)

Minimum Vertical Section Modulus 113.5 cu. in. (1860 cm³)

Average Vertical Section Modulus at Saddle . . . 157 cu. in. (2572 cm³)

Draft Frame

Welded box construction machined for flatness with double ball-and-socket pivot connection, equipped with replaceable wear inserts

Circle 772D

Type	welded construction, heat treated for strength, machined for flatness, equipped with replaceable wear inserts
Circle Diameter	60 in. (1.52 m)
Rotation	360 degrees
Drive	hydraulic motor and worm gear with positive lock
Side Shift	
Right	28.5 in. (724 mm)
Left	31 in. (787 mm)

Moldboard

Type	high-strength, pre-stressed, wear-resistant, high-carbon steel, equipped with replaceable side-shift wear inserts
Length	12 ft. 0 in. (3.66 m)
Height	24 in. (610 mm)
Thickness	0.88 in. (22 mm)

Cutting Edge

Type	Dura-Max® through-hardened steel edge
Thickness and Width	0.62 x 6 in. (16 x 152 mm)

Scarifiers

	<i>front</i>	<i>mid-mount</i>
Type	V-type manual two-pitch position with hydraulic float	V-type manual three-pitch position with hydraulic float
Width of Cut	48 in. (1.20 m)	46.6 in. (1.18 m)
Number of Teeth	5 standard, can hold up to 9	11
Shank Spacing	5.75 in. (146 mm)	4.6 in. (117 mm)
Lift Above Ground	21.8 in. (554 mm)	13 in. (330 mm)
Maximum Penetration	13.3 in. (338 mm)	11.5 in. (292 mm)
Shank Size	1 x 3 in. (25 x 76 mm)	1 x 3 in. (25 x 76 mm)

Rear Ripper / Scarifier

	<i>parallelogram linkage with manual valve control and hydraulic float, tool bar for five ripper and nine scarifier shanks</i>	<i>scarifier</i>
Type		
Width of Cut	87 in. (2.21 m)	87 in. (2.21 m)
Number of Shanks	3 standard, can hold up to 5	can hold up to 9
Lift Above Ground	21.4 in. (544 mm)	26.8 in. (681 mm)
Maximum Penetration	18 in. (457 mm)	12.7 in. (323 mm)
Shank Size	2.25 x 5.5 in. (57 x 140 mm)	1 x 3 in. (25 x 76 mm)

Capacities (U.S.)

Fuel Tank	106 gal. (401.2 L)	Differential Housing	9.5 gal. (36 L)
Cooling System	13 gal. (49.2 L)	Tandem Housings (each)	20 gal. (75.7 L)
Engine Lubrication, Including Filter	7.5 gal. (28.4 L)	Circle Gearbox	1.5 gal. (5.7 L)
Transmission	6 gal. (22.7 L)	Hydraulic Reservoir	14 gal. (53 L)

Dimensions

A Height to Top of Blade-Lift Cylinders	116 in. (2.95 m)	F Wheelbase	20 ft. 1 in. (6.12 m)
B Height to Top of Exhaust	122 in. (3.10 m)	G Overall Length	346.7 in. (8804 mm)
C Height to Top of Cab*	10 ft. 5 in. (3.18 m)	H Overall Length with Scarifier	375.4 in. (9534 mm)
D Blade Base	101.1 in. (2568 mm)	I Overall Length with Scarifier and Ripper	405.7 in. (10 304 mm)
E Tandem Axle Spacing	60.8 in. (1.54 m)		*Add 8.9 in. (225 mm) for full-height cab.

**Optional or Special Equipment
With Approximate Weights**

772D

Add these weights to SAE standard equipment operating weight to obtain total operating weight.

Coolant Heater	8 lb. (4 kg)
Rotary Ejector Precleaner	17 lb. (8 kg)
Lighting Packages with LED Colored Lights	
Grading (10 halogen lights): Transportation Lights Plus Mid-Frame (2), Under Cab (2), and Backup Reverse Lights (2)	8 lb. (4 kg)
Deluxe Grading (16 halogen lights): Grading Lights Plus Front Roof Inner (2), Front Roof Outer (2), and Rear Roof Lights (2)	17 lb. (8 kg)
Deluxe Grading Lights with Additional Right-Side Cab Roof Lights (2) (18 halogen lights): Deluxe Grading Lights Plus Rear Right-Side Roof Lights (2)	20 lb. (9 kg)
High-Front Light Bar for Snowplowing	44 lb. (20 kg)
24- to 12-Volt 30-Amp Converter	3 lb. (1 kg)
Auxiliary Hydraulic Control Valve Section and Controls (optional valves are available for attachments such as rear ripper, front-mounted scarifier, and snow equipment; see dealer price list for details)	15 lb. (7 kg)

Specifications

Engine 872D

Type	John Deere PowerTech™ 6081H; certified to EPA Tier 2 emissions	
Rated Speed	2,000 rpm	
Engine Power		
Gears 1–2 (6WD on)	205 net hp (153 kW)	
Gears 3–5 (6WD on)	230 net hp (172 kW)	
Gears 6–7 (6WD on)	245 net hp (183 kW)	
Gear 8 (6WD off)	235 net hp (175 kW)	
Aspiration	turbocharged with waste-gate boost pressure regulation and air-to-air aftercooler	
Number of Cylinders	6	
Displacement	494 cu. in. (8.1 L)	
Net Torque @ 1,000 rpm	<i>6WD off</i>	<i>6WD on</i>
Gears 1–2	793 lb.-ft. (1075 Nm) @ 57% net torque rise	835 lb.-ft. (1132 Nm) @ 52% net torque rise
Gear 3	835 lb.-ft. (1132 Nm) @ 52% net torque rise	896 lb.-ft. (1215 Nm) @ 46% net torque rise
Gears 4–5	872 lb.-ft. (1182 Nm) @ 48% net torque rise	896 lb.-ft. (1215 Nm) @ 46% net torque rise
Gears 6–7	942 lb.-ft. (1277 Nm) @ 56% net torque rise	961 lb.-ft. (1303 Nm) @ 53% net torque rise
Gear 8	942 lb.-ft. (1277 Nm) @ 56% net torque rise	N/A
Lubrication	pressure system with full-flow filter and cooler	
Air Cleaner with Restriction Indicator	dual element, dry, with tangential unloader	
Electrical System	24 volt with 100-amp alternator	
Batteries (two 12 volt)	1,400 cold-cranking amps, 440-min. reserve capacity	

Steering and Articulation

All-hydraulic power frame articulation for maneuverability and productivity; crab steering reduces side drift, positions tandems on firm ground, and increases side slope stability	
Front steer plus articulated	
Articulation (both left and right)	22 degrees
Turning Radius (front steer plus articulation)	23 ft. 6 in. (7.16 m)
Front Wheel Lean	20 degrees

Six-Wheel Drive

Automatic dual path; increases tractive effort and front-end control; includes separate left and right systems with variable-displacement pumps, axial piston wheel motors, free wheel at transport speeds, operator-selectable 15-position rotary aggressiveness control, inching capability down to 0 mph, and on/off control	
Conventional Mode Effective Gears	1–7 forward and reverse
Precision Mode	
Effective Gears	1–3 forward only
Effective Speeds	0.25–5.0 mph (0.4–8.0 km/h)
Hydrostatic Pumps (2)	3.9 cu. in. (64 cm³) each
Wheel Motors, Variable Displacement	1.2 to 3.7 cu. in. (20 to 60 cm³)
Final Reduction	38.7:1

Tires and Rims

Tire Size	Front	Rear
14.00-24 on 10-in. (254 mm) Rim		
Wheel Tread (on ground)	82 in. (2.08 m)	82 in. (2.08 m)
Overall Width (top of tires)	99 in. (2.51 m)	98 in. (2.49 m)
Ground Clearance (front axle)	23.1 in. (587 mm)	
17.5-25 on 14-in. (356 mm) Rim		
Wheel Tread (on ground)	85 in. (2.16 m)	85 in. (2.16 m)
Overall Width (top of tires)	104 in. (2.64 m)	104 in. (2.64 m)
Ground Clearance (front axle)	23.1 in. (587 mm)	

Productivity

Blade Pull @ Maximum Weight and 0.9	
Coefficient of Traction	43,760 lb. (19 849 kg)

Operating Weights **872D**

SAE Operating Weights With Standard Equipment	
Front	10,170 lb. (4613 kg)
Rear	26,040 lb. (11 812 kg)
Total	36,210 lb. (16 421 kg)
Typical Operating Weights with Front Push Block and Ripper	
Front	11,600 lb. (5262 kg)
Rear	30,640 lb. (13 897 kg)
Total	42,240 lb. (19 159 kg)
Maximum Operating Weight (snow equipment)	
Rear	32,576 lb. (14 777 kg)
Total	48,620 lb. (22 045 kg)

Transmission

Type	direct-drive John Deere PowerShift Plus™, modulated shift on-the-go, Event-Based Shifting (EBS), inching pedal
Travel Speeds (with no tire slip)	<i>Forward and reverse @ 2,000 rpm with 17.5-R25 tires</i>
Shift Lever Position 1	2.3 mph (3.7 km/h)
Shift Lever Position 2	3.3 mph (5.2 km/h)
Shift Lever Position 3	4.5 mph (7.2 km/h)
Shift Lever Position 4	6.3 mph (10.0 km/h)
Shift Lever Position 5	9.5 mph (15.2 km/h)
Shift Lever Position 6	13.3 mph (21.3 km/h)
Shift Lever Position 7	18.4 mph (29.4 km/h)
Shift Lever Position 8	25.7 mph (41.1 km/h)

Final Drives

Spiral bevel differential, inboard-mounted planetary sealed in cooled, filtered oil; operator-controlled differential lock/unlock; 2-in. (51 mm) pitch tandem drive chains

Front Axle

Heavy-duty, welded box construction	
Oscillation (total)	32 degrees
Wheel Lean (each direction)	20 degrees

Brakes

Foot-controlled, hydraulically operated, multiple wet-disc brakes sealed in cooled, filtered oil; self adjusting, maintenance free; includes spring-applied, hydraulically released parking brake; both independent braking systems effective on all four tandem wheels

Hydraulic System

Type	closed center, pressure compensated load sensing (PCLS), variable-displacement piston pump, O-ring face seal fittings
Hydraulic Pump	5.5 cu. in. (90 cm ³)
Rated Flow @ 2,000 rpm	54.7 gpm (207 L/min.)
Maximum System Pressure	2,750 psi

Blade Function

All-hydraulic, industry preferred hand-lever placement of blade-function controls; includes float position; easy conversion from two-hand to one-hand blade-lift control; seven blade-lift arm positions

Blade Range	
Lift Above Ground	17.2 in. (437 mm)
Blade Side Shift, Right or Left	26.9 in. (680 mm)
Shoulder Reach Outside Wheels (Frame)	
Straight	
Right	91 in. (2.31 m)
Left	91.5 in. (2.32 m)
Pitch at Ground Line	42 degrees forward / 5 degrees back

ROPS

Low-profile cab, full-height cab, and canopy ROPS (Rollover Protective Structure) meet criteria within SAE J1040MAY 1994, ISO 3471-1997, SAE J397MAY1994, and ISO 3164

Mainframe

Type	welded box construction
Width, Minimum	12.07 in. (306.5 mm)
Height, Minimum	10.63 in. (270 mm)
Thickness	
Sides	0.63 in. (16 mm)
Top and Bottom	1.26 in. (32 mm)
Weight per ft., Minimum	137 lb./ft. (204 kg/m)
Minimum Vertical Section Modulus	132.2 cu. in. (2166 cm ³)
Average Vertical Section Modulus at Saddle	183.1 cu. in. (3001 cm ³)

Draft Frame

Welded box construction machined for flatness with double ball-and-socket pivot connection, equipped with replaceable wear inserts

**Optional or Special Equipment
With Approximate Weights**

872D

●	●	●	Operator-controlled, hydraulically operated differential lock
●	●	●	Spiral bevel planetary final drives
●	●	●	Separate oil lubrication, filtration, and cooling system
●	●	●	Inboard, wet multi-disc brakes
●	●	●	Primary and secondary brakes, SAE J / ISO 3450
●	●	●	Spring-applied, hydraulically released parking brake, SAE J / ISO 3450

Electrical

●	●	●	Heavy-duty, low-maintenance, 1,400 CCA, 440-min. reserve capacity batteries (2)
▲	▲	▲	Heavy-duty, low-maintenance, 750 CCA, 180-min. reserve capacity batteries (2)
●	●	●	100-amp alternator
●	●	●	Bypass start safety cover on starter
●	●	●	Electrical load center
●	●	●	Individual circuit protection, blade-type fuses
●	●	●	Electrical master disconnect switch
●	●	●	Positive terminal battery covers
●	●	●	High-output halogen transporting lights (4)
●	●	●	Cab prewired for rotating beacon, radio, and auxiliary circuit
●	●	●	Electric horn, SAE J1446

672	772	872	Electrical (continued)
●	●	●	Reverse warning alarm, 111 db(A), SAE J994
●	●	●	Rear stop lights (2)
●	●	●	Front and rear turn signals (2)
▲	▲	▲	Halogen grading lights (10)
▲	▲	▲	Deluxe halogen lighting package (16)
●	●	●	LED brake and turn lights
▲	▲	▲	Deluxe halogen snow package (18)

Hydraulic System

●	●	●	Separate reservoir, filtration, and cooling system
●	●	●	54.7-gpm (207 L/min.) axial-piston main pump
●	●	●	O-ring face seal fittings
●	●	●	Float position on blade cylinders
▲	▲	▲	Conversion kit from two-hand to one-hand blade lift
▲	▲	▲	Hydraulic pump disconnect for cold-weather starting

6WD

●	●	●	15-position aggressiveness control
●	●	●	Automatically increases tractive effort and steering control
●	●	●	Axial-piston pumps (2) with separate left and right systems
●	●	●	Inching capability to 0 mph

Blade Functions

●	●	●	Industry preferred control pattern
●	●	●	Seven-position saddle
●	●	●	Four-function hydraulic control valve, right and left
▲	▲	▲	Up to six auxiliary function control valves, three right and three left
▲	▲	▲	Integrated Grade Control

Draft Frame

●	●	●	Double ball and socket for extreme-reach positions left and right
●	●	●	Replaceable wear inserts

Circle

●	●	●	Nylon wear inserts
▲	▲	▲	Extreme-service bronze wear inserts
●	●	●	360-degree rotation
▲	▲	▲	Circle drive with slip clutch

Moldboard

●	●	●	12-ft. x 24-in. x 0.88-in. (3.66 m x 610 mm x 22 mm) high strength, wear resistant
▲	▲	▲	14-ft. x 24-in. x 0.88-in. (4.27 m x 610 mm x 22 mm) high strength, wear resistant
▲	▲	▲	12-ft. x 27-in. x 1-in. (3.66 m x 686 mm x 25 mm) high strength, wear resistant
▲	▲	▲	13-ft. x 27-in. x 1-in. (3.96 m x 686 mm x 25 mm) high strength, wear resistant
▲	▲	●	14-ft. x 27-in. x 1-in. (4.27 m x 686 mm x 25 mm) high strength, wear resistant
▲	▲	▲	16-ft. x 27-in. x 1-in. (4.88 m x 686 mm x 25 mm) high strength, wear resistant
●	●	●	Standard-duty wear inserts
▲	▲	●	Extreme-service wear inserts

Cutting Edge

●	●	●	0.62-in. x 6-in. (16 mm x 152 mm) Dura-Max® through-hardened steel
▲	▲	●	0.75-in. x 8-in. (19 mm x 203 mm) Dura-Max through-hardened steel

Front Attachments

▲	▲	▲	Push block
▲	▲	▲	Front weight, 550 lb.
▲	▲	▲	V-type scarifier with float position, 5 shanks
▲	▲	▲	Mid-mount scarifier with float position, 11 shanks

*See your John Deere dealer for further information.

672	772	872	Front Attachments (continued)
▲	▲	▲	Auxiliary hydraulics for front-mounted equipment

Rear Attachments

▲	▲	▲	Ripper/scarifier combination with parallelogram linkage
▲	▲	▲	Bottom guard
▲	▲	▲	Side panels for bottom guard

Tires and Rims

●	●	▲	Single-piece rims
▲	▲	●	Three-piece rims
▲	▲	▲	13.00-24, 12 PR G2
▲	▲	▲	14.00-24, 12 PR G2
▲	▲	▲	17.5-25, 12 PR L2
●	●	▲	14.00-R24, Radial
▲	▲	●	17.5-R25, Radial
▲	▲	▲	550/65R25

Operator's Station

●	●	●	Low-profile ROPS cab with air conditioning and heater
▲	▲	▲	ROPS canopy
▲	▲	▲	Full-height ROPS cab with air conditioning and heater
●	●	●	Adjustable front console with tilt steering wheel
●	●	●	Gauges: Fuel level / Engine coolant temperature / Rear steer indicator / Transmission and hydraulic oil temperature
●	●	●	Monitor system with warning lights: Park brake on / Service brake pressure and/or audible alarm / Hydraulic oil temperature / Transmission oil temperature / Engine oil pressure / Alternator voltage / Differential lock filter restriction / Engine air filter restriction / Wait to start (cold start) / Transmission oil filter restriction / Hydraulic oil filter restriction / Differential lock engaged / Saddle lock pin disengaged / Service code warning
●	●	●	HFWD charge pressure with audible alarm / HFWD charge filter restriction / HFWD temperature
●	●	●	Lighted HFWD on-off switch
●	●	●	Selectable display on monitor: Transmission gear and direction / Vehicle speed (mph) / Vehicle speed (km/h) / Engine speed (rpm) / Hourmeter / Alternator voltage / Service codes
●	●	●	Indicators: Turn signal / Four-way flasher
●	●	●	Instrument lights
●	●	●	Interior lights
●	●	●	Rearview mirrors (SAE J985): Exterior (2) / Interior
●	●	●	Deluxe mechanical-suspension seat with adjustable armrests
▲	▲	▲	Deluxe air-suspension seat with adjustable armrests
●	●	●	Retractable seat, 3 in., SAE J386
●	●	●	Tinted glass
▲	▲	▲	Wipers for lower-front windows
●	●	●	Front and rear windshield washers with intermittent wipers
▲	▲	▲	Operable lower-front windows
●	●	●	Rear window electrical defroster
▲	▲	▲	Radio, AM/FM/weatherband
▲	▲	▲	Radio, AM/FM/weatherband with cassette
▲	▲	▲	Radio, AM/FM/weatherband with CD
▲	▲	▲	Heated outside mirrors
●	●	●	Floor mat

JOHN DEERE

DKADGDAWD Litho in U.S.A. (07-09)

Net engine power is with standard equipment including air cleaner, exhaust system, alternator, and cooling fan at test conditions specified per ISO9249. No derating is required up to 10,000-ft. (3050 m) altitude.

Specifications and design subject to change without notice. Wherever applicable, specifications are in accordance with SAE standards. Except where otherwise noted, these specifications are based on units with standard equipment: 672D and 772D units with 14.00-R24, Radial tires and 12-ft. x 24-in. x 0.88-in. (3.66 m x 610 mm x 22 mm) high-strength, wear-resistant moldboards with 0.62-in. x 6-in. (16 mm x 152 mm) Dura-Max through-hardened-steel cutting edges; and 872D unit with 17.5-R25, Radial tires and 14-ft. x 27-in. x 1-in. (4.27 m x 686 mm x 25 mm) high-strength, wear-resistant moldboard with 0.75-in. x 8-in. (19 mm x 203 mm) Dura-Max through-hardened-steel cutting edge. Weights include lubricants, coolants, full fuel tanks, and 175-lb. (79 kg) operators.
