## Crane Trailers

SOLID AS A ROCK

FLOOR® C-LINE

# FLOOR C-LINE FLO-18-30S2

# 3-AXLE CRANE TRAILER

The Floor **C-LINE** crane trailer is the ideal transport solution for efficiently transporting building materials such as bricks, concrete slabs, sewage pipes, window frames etc..

The **C-LINE** crane trailer is equipped with forced-steering axles, the rearmost axle has a steering angle of 45 degrees maximum. Any sites that are not easy to get to for loading or unloading become easily, quickly and safely accessible with the **C-LINE** crane trailer. In combination with the mobile crane the load can be loaded and unloaded on virtually any site.

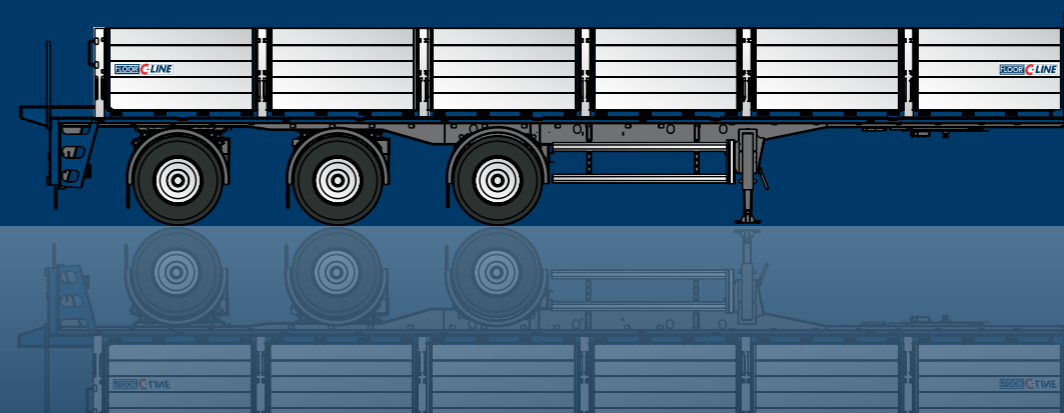

Because the crane can be moved along the load floor, a much lighter crane can be used. For instance a 13 tonne metre crane will have a 5 metre operating radius around the vehicle. And with a reinforced chassis (optional) the **C-LINE** will take cranes up to 24 tonne metres. Depending on the type of load, the mobile crane can be positioned in various places on the semi-trailer, which means several trips can be combined into one transport. The crane is demountable so that the semi-trailer can also be used for other purposes.

## THE NEW FLOOR C-LINE CRANE TRAILER

### FLOOR C-LINE FLO-18-30S2

Technical capacity	48 tonnes
Load floor length	10.650-13.450 mm
Coupling height	1.150-1.300 mm
Load floor height	1.500 mm
Crane capacity	t/m 24 tonne metres

**2 STEERED AXLES**

**SOLID AS A ROCK**

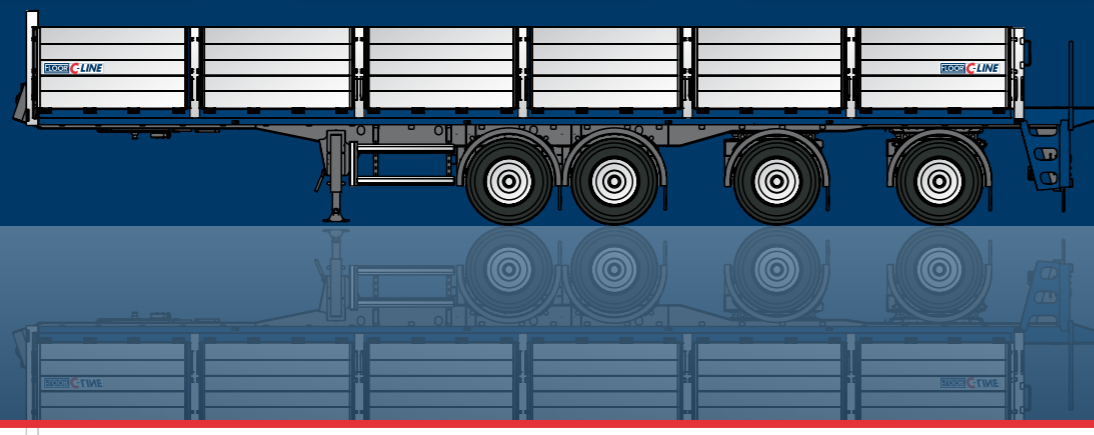

# FLOOR C-LINE FLO-18-36S2

# 4-AXLE CRANE TRAILER

If more load capacity is required, the Floor **C-LINE** crane trailer can be equipped with 4 axles to provide a technical capacity of 54 tonnes. If you want to avoid overloading your tractor, the patented Floor Payload Adjusting System (PAS) is an excellent tool. This system ensures that the fifth-wheel pressure of your tractor is optimized automatically. It is available on all 4-axle **C-LINE** Crane Trailers.

The chassis of the **C-LINE** crane trailer is extremely strong and has high torsional stiffness. This is necessary because of the forces the structure will inevitably be subjected to by the crane. The crane trailer with mobile crane will always provide more capacity and flexibility than a fixed crane of similar size. It is highly efficient and has a huge reach. The trailer with crane is extremely versatile and does exactly what it's supposed to do : it transports, loads and unloads heavy loads.

2 STEERED AXLES

## FLOOR C-LINE FLO-18-27S2

- Technical capacity 54 tonnes
- Load floor length 12.550-13.450 mm
- Coupling height 1.140-1.250 mm
- Load floor height 1.500 mm
- Crane capacity t/m 24 tonne metres

# DETAILS & OPTIONS

## EASYCONN AND LED

The Floor **C-LINE** is equipped, as standard, with HELLA EasyConn LED side and head lights. Rear lights also available in LED configuration.

## FORCED STEERING AXLES

The extremely manoeuvrable **C-LINE** crane trailer offers a steering displacement of no less than 45 degrees. Available with rod steering system as well as hydraulic steering and manual steering.

## FLOOR AIR SUSPENSION

For excellent suspension and outstanding rolling stability the **C-LINE** crane trailer is equipped, as standard, with the extremely reliable Floor air suspension.

## BULKHEAD MEETS NEW REGULATIONS

The new demountable bulkhead of the **C-LINE** is designed in accordance with the new regulations for load securing that will take effect in 2010. So you already comply with the strictest load securing requirements.

## ELECTRICAL CONNECTIONS

Whether your tractor has a 2x7 core or 1x15 core connection, it makes no difference for the **C-LINE**. It is standard equipped with a multi-functional electrical connection unit.

With the new **C-LINE** crane trailer Floor proves that quality doesn't have to be expensive. The **C-LINE** is a top-quality product made with branded components only. The crane trailer is fully equipped as standard. Many clever details and a wide choice of options, offers you

the opportunity to configure a **C-LINE** crane trailer that exactly meets your particular requirements. The sophisticated **C-LINE** concept guarantees maximum reliability, driver-friendliness, transport flexibility and lower running costs. **If profitability matters, the new Floor C-LINE crane trailer is your ideal transport solution.**

## SECURING THE LOAD

With the **C-LINE** your load can be tied down safely and securely. There are integrated drop rings on top of the sides and more than 50 rope hooks underneath.

## STRONG & ROBUST CHASSIS

The Floor **C-LINE** crane trailer provides you with an extremely solid chassis that will easily take heavy peak loads and roller cranes up to 24 tonne metres.

## ERGONOMIC STEPS

For stepping onto the load floor of the **C-LINE** you can choose from various ergonomic steps. Positioned as required: at the front, rear, on the left or on the right of the load floor. Can also be fitted afterwards.

## ALUMINIUM AIR RESERVOIRS

The new **C-LINE** is equipped with lightweight aluminium air reservoirs, just one of the features to reduce your maintenance costs and increase your payload.

## BRANDED COMPONENTS

Floor stands for top quality. With the new **C-LINE** you will have a crane trailer made of top-quality materials and branded components.

## NOOTEBOOM GROUP

The Nootboom Group comprises 5 subsidiaries, predominantly engaged in the development and production of transport solutions. Koninklijke Nootboom Trailers B.V., the largest subsidiary, is the major European player in the production of vehicles for abnormal road transport. NTOS Used Trailer Centre concentrates on the buying and selling of used special transport vehicles world wide. The activities of Floor Trailers B.V. are predominantly focused on niche markets within the traditional semi-trailer and drawbar trailer market. Kennis Trailers specializes in the manufacture and marketing of brick-trailers for the construction industry. NFTS Trailer Service provides service and repairs for (mainly) special transport vehicles. The Nootboom Holding subsidiaries employ over 550 people and sell approx. 1500 vehicles every year. Total turnover amounts to more than € 100 million.

## FLOOR TRAILERS B.V.

Floor Trailers is a trendsetting manufacturer of semi-trailers and drawbar trailers for the European market. The Floor programme is mainly designed to meet the needs of niche markets within the transport sector. Products available include steered crane trailers, flatbed semi-trailers, extendible semi-trailers, high-quality distribution semi-trailers and container drawbar trailers. Each and every one of them an innovative and efficient transport solution with an excellent price-quality ratio, put on the road and kept there by 150 customer-oriented employees. If you opt for reliability, opt for Floor Trailers.
