**A SYMBOL OF VALUE
FOR YEARS DOWN THE ROAD:
A TRUCK THAT'S MATCHED
TO YOUR APPLICATION.**

Mercedes-Benz makes six diesel truck models here in the U.S., each one matched to specific application demands. Your Mercedes-Benz Truck Dealer can assist you in determining what model is right for your job.

L1013. A 22,000 lb. GVW truck that proves diesels are indeed practical in low-mileage, light-payload applications. It offers the same quality and features of our heavier vehicles.

L1113. A 25,000 lb. GVW truck that's tough, durable and built for stop-and-go inter-city driving. Applications include freight van body, flatbeds, rack body and refrigerated units.

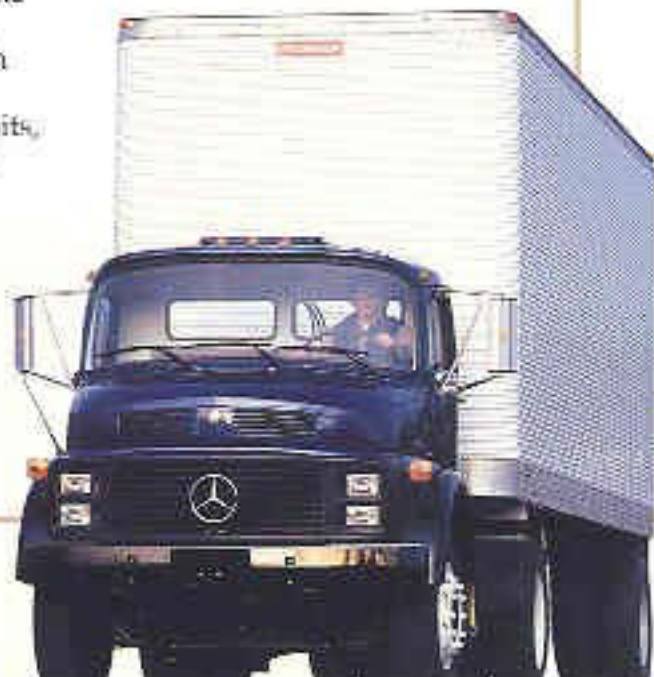

L1116. A 25,000 lb. GVW truck with a turbo-charged engine. Designed for turnpike driving, pick-up and delivery, food distribution and those uses that require more power than the L1113 offers.

L1316. A 30,000 lb. GVW, Class 7 truck with higher capacity axles, larger tires and a turbo-charged engine. Ideal for larger refrigerated units, heavy P&D operations, beverage hauling and refuse collecting.

L1418. A 32,225 lb. GVW truck with 47% more torque than the L1316. A perfect match for most top end of Class 7 applications.

LS1418. A 55,000 lb. GVW, Class 7 tractor designed and built to meet the special demands of city transport. Its short cab and small turning radius make the LS1418 ideal for use on urban routes.
