PRODUCTIVITY, ECOLOGY & ECONOMY

Komatsu Technology

Komatsu develops and produces all major components, such as engines, electronics and hydraulic components, in house. With this “Komatsu Technology” and adding customer feedback, Komatsu is achieving great advancements in technology. To achieve both high levels of productivity and economical performance, Komatsu has developed the main components with a total control system. The result is a new generation of high performance and environment friendly excavators.

Environment-friendly Clean Engine

The PC450-8 gets its exceptional power and work capacity from a Komatsu SAA6D125E-5 engine. Output is 257 kW 345 HP, providing increased hydraulic power and improved fuel efficiency. Komatsu SAA6D125E-5 engine is U.S. EPA Tier 3 and EU Stage 3A emissions certified with NOx emission reduced by 40%. The SAA6D125E-5 engine adopts the electronically controlled heavy duty High Pressure Common Rail (HPCR) fuel injection system and cooled Exhaust Gas Recirculation (EGR) system with electronically controlled bypass-assist type venturi.

Low Operation Noise

Enables a low noise operation using the low-noise engine and methods to cut noise at source. Ambient noise meets the EU Stage 2 noise regulation.

Excellent Machine Stability

Large counterweight offers superior machine stability and balance.

Idling Caution

To prevent unnecessary fuel consumption, an idling caution is displayed on the monitor, if the engine idles for 5 minutes or more.

ECO Gauge that Assists Energy-saving Operations

Equipped with the ECO gauge that can be recognized at a glance on the right of the multi-function color monitor for environment-friendly energy-saving operations. Allows focus on operation in the green range with reduced CO₂ emissions and efficient fuel consumption.

ECO gauge

Working Modes Selectable

The PC450-8 excavator is equipped with five working modes (P, E, L, B and ATT mode). Each mode is designed to match engine speed and pump output to the application. This provides the flexibility to match equipment performance to the job at hand.

Working Mode	Application	Advantage
P	Power mode	<ul style="list-style-type: none"> • Maximum production/power • Fast cycle times
E	Economy mode	<ul style="list-style-type: none"> • Good cycle times • Better fuel economy
L	Lifting mode	<ul style="list-style-type: none"> • Suitable attachment speed • Lifting capacity is increased 7% by raising hydraulic pressure.
B	Breaker mode	<ul style="list-style-type: none"> • Optimum engine rpm, hydraulic flow
ATT	Attachment mode	<ul style="list-style-type: none"> • Optimum engine rpm, hydraulic flow, 2 way

Variable Track Gauge (Optional)

- Lateral stability is significantly improved when operating with the gauge extended.
- Lateral stability is increased by 30% (Compared with the fixed gauge version).
- With trackframes retracted, overall width complies with many local transportation regulations.

Large Digging Force

When press the left knob switch which is called the one-touch power max. switch and when it is kept pressed, this function temporarily increases digging force for 8.5 seconds of operation.

Maximum arm crowd force (ISO 6015):
 218 kN (22.2 t) ➔ **233 kN (23.8 t)** **7% UP**
 (With Power Max.)

Maximum bucket digging force (ISO 6015):
 259 kN (26.4 t) ➔ **278 kN (28.3 t)** **7% UP**
 (With Power Max.)

Measured with Power Max. function, 3380 mm arm and ISO 6015 rating.

One-touch power max. switch

Smooth Loading Operation

Two return hoses improve hydraulic performance. In the arm out function, a portion of the oil is returned directly to the tank providing smooth operation.

Return hoses

Two-mode Setting for Boom

Smooth mode provides easy operation for gathering blasted rock or scraping down operation. When maximum digging force is needed, switch to Power mode for more effective excavating.

Boom floats upward, reducing lifting of machine front. This facilitates gathering blasted rock and scraping down operations.

Boom pushing force is increased, ditch digging and box digging operation on hard ground are improved.

COMFORT

Low Cab Noise

The newly-designed cab is highly rigid and has excellent sound absorption ability. Thorough improvement of noise source reduction and use of low noise engine, hydraulic equipment, and air conditioner allows this machine to generate a low level of noise.

Low Vibration with Cab Damper Mounting

PC450-8 uses viscous damper mounting for cab that incorporates longer stroke and the addition of a spring. The new cab damper mounting combined with high rigidity deck aids vibration reduction at operator seat.

Wide Newly-designed Cab

Newly-designed wide spacious cab includes seat with reclining backrest. The seat height and longitudinal inclination are easily adjusted using a pull-up lever. You can set the appropriate operational posture of armrest together with the console. Reclining the seat further enables you to place it into the fully flat state with the headrest attached.

Pressurized Cab

Optional air conditioner (A/C), air filter and a higher internal air pressure minimize external dust from entering the cab.

Automatic Air Conditioner (A/C) (Optional)

Enables you to easily and precisely set cab atmosphere with the instruments on the large LCD. The bi-level control function keeps the operator's head and feet cool and warm respectively. This improved air flow function keeps the inside of the cab comfortable throughout the year. Defroster function keeps front glass clear.

SAFETY

ROPS Cab

The machine is equipped with a ROPS cab that conforms to ISO 12117-2 for excavators as standard equipment. The ROPS cab has high shock-absorption performance, featuring excellent durability and impact strength. It also satisfies the requirements of OPG top guard level 1 (ISO 10262) for falling objects. Combined with the retractable seat belt, The ROPS cab protects the operator in case of tipping over and against falling objects.

ROPS CAB STRUCTURE

Slip-resistant Plates

Highly durable slip-resistant plates maintain superior traction performance for the long term.

Lock Lever

Locks the hydraulic pressure to prevent unintentional movement. Neutral start function allows machine to be started only in lock position.

Rear View Monitor System (Optional)

The operator can view the rear of the machine with a color monitor screen.

Rear view image on monitor

Pump/Engine Room Partition

Pump/engine room partition prevents oil from spraying onto the engine if a hydraulic hose should fail.

Thermal and Fan Guards

Thermal and fan guards are placed around high-temperature parts of the engine and fan drive.

Large Serrated Steps and Handrail

Large serrated steps

Large handrail

Large Multi-lingual LCD Monitor

A large user-friendly color monitor enables safe, accurate and smooth work. Improved screen visibility is achieved by the use of LCD that can easily be read at various angles and lighting conditions. Simple and easy to operate switches. Function keys facilitate multi-function operations. Displays data in 12 languages to globally support operators around the world.

Equipment Management Monitoring System

Monitor function

Controller monitors engine oil level, coolant temperature, battery charge and air clogging, etc. If controller finds any abnormality, it is displayed on the LCD.

Maintenance function

Monitor informs replacement time of oil and filters on the LCD when the replacement interval is reached.

Trouble data memory function

Monitor stores abnormalities for effective troubleshooting.

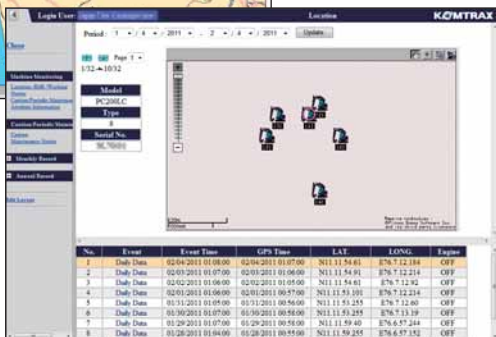

Assists Customer's Equipment Management and Contributes to Fuel Cost Cutting

Equipment Management Support

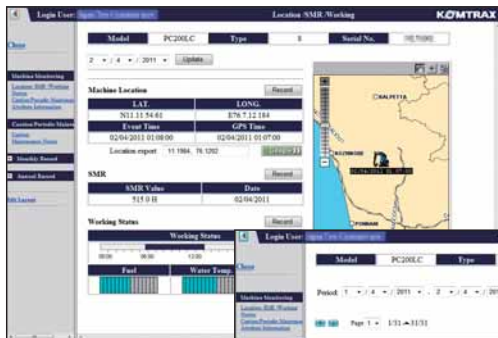

KOMTRAX terminal installed on your machine collects and sends information such as machine location, working record, machine conditions, etc. using wireless communication. You can review the KOMTRAX data remotely via the online application. KOMTRAX not only gives you the informations on your machine, but also the convenience of managing your fleet on the Web.

Location

Movement generated position

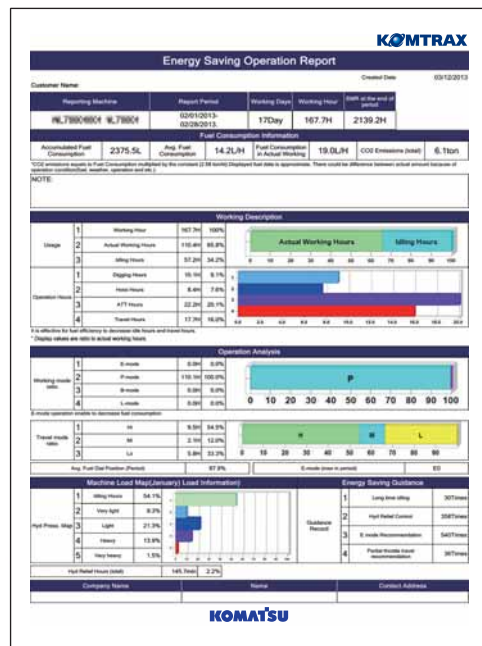

Operation map

Monthly status summary

Energy-saving Operation Support Report

KOMTRAX can provide various useful information which includes the energy-saving operation support report created based on the operating information of your machine such as fuel consumption and idle time.

Image

MAINTENANCE

Easy Access to Engine Oil Filter and Fuel Drain Valve

Engine oil dipstick and fill, and fuel filter are mounted on same side to improve accessibility. Fuel drain valve are remotely mounted to improve accessibility.

Fuel drain valve

Easy Radiator Cleaning

Since radiator and oil cooler are arranged side-by-side, it is easy to clean, remove and install them.

Large-size Steps

On both right and left track frames are fixed with wider steps for easier maintenance.

Large Capacity Air Cleaner

Large capacity air cleaner is comparable to that of larger machines. The larger air cleaner can extend air cleaner life during long-term operation and prevents early clogging and resulting power decrease. Reliability is improved by a new seal design.

Long-life Oil, Filter

Uses high-performance filtering materials and long-life oil. Extends the oil and filter replacement interval.

Hydraulic oil filter

Engine oil & Engine oil filter	every 500 hours
Hydraulic oil	every 5000 hours
Hydraulic oil filter	every 1000 hours

Long Work Equipment Greasing Interval (Optional)

High quality bushings and resin shims are optionally available for work equipment pins excluding bucket, extending greasing interval to 500 hours.

Large Fuel Tank Capacity

Large fuel tank capacity extends operating hours before refueling. Fuel tank is treated for rust prevention and improved corrosion resistance.

RELIABILITY

High Pressure In-line Filter

In-line filters are provided at outlet port (Pressure side) of each pump to protect hydraulic system contamination.

In-line filters

Equipped with Fuel Pre-filter (With Water Separator)

Removes water and contaminants in the fuel to prevent fuel problems.

Metal Guard Rings

Metal guard rings protect all the hydraulic cylinders and improve reliability.

Fuel Main-filter

The reliability of fuel systems is improved, because fuel main-filter removes contamination and sludge contained in fuel.

O-ring Face Seal

The hydraulic hose seal method has been changed from a conventional taper seal to an O-ring seal. This provides improved sealing performance.

Shield Connectors

Shield connectors seal tight and have higher reliability.

OPTIONS

- Cab front full height guard level 1 (ISO 10262)

- Cab front full height guard level 2 (ISO 10262)

- Additional front lights
- Rain visor

- Air pre-cleaner

- OPG top guard level 2 (ISO 10262)

- Strengthened track frame undercover

- Sun visor

- Seat, suspension

KOMATSU BRAND BUCKET

KOMATSU Brand Bucket for General Purpose with Wide Bucket Width

Me Bucket

- Low resistant excavation
- High productivity
- High durability
- High fuel efficiency

Conventional

Me Bucket

Category and Feature

Category	Load / Wear / Soil (Application)	Image
Light Duty LD	<p>Load Machine power remains low during the majority of the work. No impact load.</p> <p>Wear Material is not abrasive.</p> <p>Soil Dirt, loam and clay.</p>	
General Purpose GP	<p>Load Machine power is mostly medium, but occasionally high. Bucket movements are smooth with minor shock load. Bucket penetrates easily.</p> <p>Wear Material is lightly abrasive. Some sand may be medium abrasive.</p> <p>Soil Mostly loose sand, gravel and finely broken materials.</p>	
Heavy Duty HD	<p>Load Machine power is high during majority of the work. Medium, but continuous shock load.</p> <p>Wear Material is abrasive. Light scratch marks can be seen at the bucket.</p> <p>Soil Limestone, shot rock, compact mix of sand, gravel and clay.</p>	
Extra Heavy Duty XHD	<p>Load Machine power is high during most of the work, often at maximum. Dynamic shock loads are frequent and machine may shake.</p> <p>Wear Material is very abrasive. Large scratch marks are visible and, or deform metal. Works within heaps of rock with occasional un-shot rock and rock boulders.</p> <p>Soil Granite, basalt, quartz sand, compact and sticky clay.</p>

Feature of [Me Bucket] (More suitable shape and Effectiveness Bucket)

High Productivity by Low-resistant Excavation

The new Ideal bucket profile produces lower resistance at inside & outside bucket and production will be greatly increased.

Feature of [PAB Tooth] (Pin And Bushing system Tooth)

- Able to fit on the bucket with horizontal pin type adapter
 - Easy change-out only with a ratchet wrench
 - Longer tooth life by easy rotation and turnover
 - Durable and reusable PAB pin with flat surface
- Limited to where horizontal pin type tooth is mainly used.

Set PAB tooth to horizontal pin type adapter

Insert exclusive pin to the adapter pin hole

Set bushing, washer and bolt and tighten by a ratchet wrench

Feature of KMAX Tooth System

- Better penetration and cycle times
- Hardness throughout the tooth
- Unique high strength design
- Unique reusable fastener
- Less "throw away" waste
- Fast tooth changeover

Tooth

477-532 Brinell level of hardness throughout the tooth.

The KMAX RC style tooth shown here offers a consumption ratio of 60%.

Fastener

Simple, reusable fastener system saves time and money by unlocking with a simple 90-degree turn.

To lock, use the correct size socket, rotate the pin locking shaft 90-degree clockwise to finish the installation.

When removing the fastener, use the correct size socket to rotate the pin-locking shaft 90-degree counter-clockwise.

KMAX Tooth Line-up

Feature	Style
F Flare: Loose material for clean bottom and greater fill	
SYL Standard: General applications	
SD Chisel: General purpose tooth Designed for penetration

QUARRY HYDRAULIC EXCAVATOR

The PC450-8 is a specially designed for heavy-duty applications. The PC450-8 has strengthened work equipment and reinforced body parts for use in severe job sites such as quarry and gravel gathering, etc.

Photo may include optional equipment.

Quarry bucket

PC450-8 bucket is designed exclusively for quarry use and is higher strength for impact and wear. Various parts of work equipment are also strengthened.

Full roller guard

Strengthened revolving frame underguard

Corner tooth adapters

Double-flange track roller

Double-flange rollers guide track link correctly and extends life of undercarriage.

Number of double-flange track rollers

PC450-83 each side
PC450LC-8.....4 each side

SE SPEC.

PC450LC-8 SE spec. is equipped with a large reinforced Me bucket for quarrying work. It increases the efficiency of loading a dump truck with large amounts of loose materials such as blasted rock.

ATTACHMENT

Komatsu Genuine Attachment Tool

Komatsu-recommended attachment tools for hydraulic excavators
A wide range of attachment tools are provided to suit customers' specific applications.

Hydraulic breaker

The hydraulic breaker is an attachment tool used for crushing rock beds and paved surfaces, demolishing concrete structures, etc. The large gas chamber, ideal gas pressure ratio, and long-stroke piston deliver a powerful impact force. Since the breaker unit does not require an accumulator, the number of parts has been reduced, resulting in lower maintenance costs.

Crusher

This attachment tool is used for demolishing concrete structures. Since it does not have a striking mechanism and features low noise and low vibration, it is suitable for work in urban areas. The open-close cylinder is equipped with a speed-up valve for increasing work speed.

Primary crusher

Pulverizer

Scrap & demolition shear

The scrap & demolition shears have multiple applications for both overhead-demolishing the steel structure (General structural steels) and cutting structural steel with required length at ground level. (In foundries, dumps, scrap yards)

KOMATSU TOTAL SUPPORT

Komatsu Total Support

To keep your machine available and minimize operation cost when you need it, Komatsu Distributor is ready to provide variety of support before and after procuring the machine.

Fleet recommendation

Komatsu Distributor can study customer job site and provide the most optimum fleet recommendation with detailed information to meet all of your application needs when you are considering to buy new machines or to replace the existing ones from Komatsu.

Product support

Komatsu Distributor secure the certain quality of machine will be delivered.

Parts availability

Komatsu Distributor is available for emergency inquiry by the customers for genuine, quality guaranteed Komatsu parts.

Technical support

Komatsu product support service (Technical support) are designed to help customer. Komatsu Distributor offers a variety of effective services how much Komatsu is dedicated to the maintenance and support of Komatsu machine.

- Preventive Maintenance (PM) clinic
- Oil & Wear analysis program
- Undercarriage inspection service, etc.

Repair & maintenance service

Komatsu Distributor offers quality repair service, periodical maintenance, and maintenance service to the customer, utilizing and promoting Komatsu developed programs.

Komatsu Reman (Remanufactured) components

Komatsu Reman products are the result of the implementation of the Komatsu global Reman policy which establishes and agrees to reduce the owning, operating and total Life Cycle Costs (LCC) to Komatsu's customer through prompt delivery, high quality and competitively priced in own remanufactured products (QDC).

SPECIFICATIONS

ENGINE

Model Komatsu SAA6D125E-5
 Type Water-cooled, 4-cycle, direct injection
 Aspiration Turbocharged, aftercooled
 Number of cylinders 6
 Bore 125 mm
 Stroke 150 mm
 Piston displacement 11.04 L
 Horsepower:
 SAE J1995 Gross 270 kW 362 HP
 ISO 9249 / SAE J1349 Net 257 kW 345 HP
 Rated rpm. 1900 min⁻¹
 Fan drive method for radiator cooling Mechanical
 Governor All-speed control, electronic

U.S. EPA Tier 3 and EU Stage 3A emissions certified.

HYDRAULICS

Type. . HydraMind (Hydraulic Mechanical Intelligence New Design) system, closed-center system with load sensing valves and pressure compensated valves
 Number of selectable working modes 4
 Main pump:
 Type Variable displacement piston type
 Pumps for Boom, arm, bucket, swing, and travel circuits
 Maximum flow 690 L/min
 Supply for control circuit Self-reducing valve
 Hydraulic motors:
 Travel 2 x axial piston motor with parking brake
 Swing 1 x axial piston motor with swing holding brake
 Relief valve setting:
 Implement circuits 37.3 MPa 380 kg/cm²
 Travel circuit 37.3 MPa 380 kg/cm²
 Swing circuit 27.9 MPa 285 kg/cm²
 Pilot circuit 3.2 MPa 33 kg/cm²
 Hydraulic cylinders:
 (Number of cylinders – bore x stroke x rod diameter)
 Boom 2–160 mm x 1570 mm x 110 mm
 Arm
 Std 1–185 mm x 1985 mm x 130 mm
 SE 1–185 mm x 1820 mm x 120 mm
 Bucket
 Std 1–160 mm x 1270 mm x 110 mm
 SE 1–185 mm x 1160 mm x 120 mm

DRIVES AND BRAKES

Steering control Two levers with pedals
 Drive method Hydrostatic
 Maximum drawbar pull 330 kN 33700 kg
 Gradeability 70%, 35°
 Maximum travel speed: High 5.5 km/h
 (Auto-shift) Mid 4.0 km/h
 (Auto-shift) Low 3.0 km/h
 Service brake Hydraulic lock
 Parking brake Mechanical disc brake

SWING SYSTEM

Drive method Hydrostatic
 Swing reduction Planetary gear
 Swing circle lubrication Grease-bathed
 Service brake Hydraulic lock
 Holding brake/swing lock Mechanical disc brake
 Swing speed 9.1 min⁻¹

UNDERCARRIAGE

Center frame X-frame
 Track frame Box-section
 Seal of track Sealed track
 Track adjuster Hydraulic
 Number of shoes (Each side):

DIMENSIONS

Model	PC450-8 / PC450LC-8	PC450-8 SE Spec. / PC450LC-8 SE Spec.
Boom Length	7060 mm	6670 mm
Arm Length	3380 mm	2400 mm
A Overall length	12040 mm	11635 mm
B Length on ground	6560 mm / 6725 mm	7860 mm
C Overall height (To top of boom)*	3660 mm	3665 mm
D Overall width	3430 mm	
E Overall height (To top of cab)*	3285 mm	
F Ground clearance, counterweight	1320 mm	
G Ground clearance (Minimum)	550 mm	
H Tail swing radius	3645 mm	
I Track length on ground	4020 mm / 4350 mm	4020 mm / 4350 mm
J Track length	5055 mm / 5385 mm	5055 mm / 5385 mm
K Track gauge	2740 mm	
L Width of crawler	3340 mm	
M Shoe width	600 mm	
N Grouser height	37 mm	
O Machine cab height	2920 mm	
P Machine cab width	3165 mm	
Q Distance, swing center to rear end	3605 mm	

* Including grouser height

WORKING RANGE

Model	PC450-8 / PC450LC-8	PC450-8 SE Spec. / PC450LC-8 SE Spec.
Boom Length	7060 mm	6670 mm
Arm Length	3380 mm	2400 mm
A Max. digging height	10925 mm	10155 mm
B Max. dumping height	7625 mm	6605 mm
C Max. digging depth	7790 mm	6740 mm
D Max. vertical wall digging depth	6600 mm	3810 mm
E Max. digging depth of cut for 2440 mm level	7650 mm	6570 mm
F Max. digging reach	12005 mm	10975 mm
G Max. digging reach at ground level	11800 mm	10750 mm
H Min. swing radius	4805 mm	4470 mm
SAE 1179 Rating	Bucket digging force at power max. 243 kN 24800 kg	280 kN 28600 kg
	Arm crowd force at power max. 225 kN 22900 kg	260 kN 26600 kg
ISO 6015 Rating	Bucket digging force at power max. 278 kN 28300 kg	308 kN 31400 kg
	Arm crowd force at power max. 233 kN 23800 kg	269 kN 27400 kg

LIFTING CAPACITY WITH LIFTING MODE

PC450-8 / PC450LC-8 / PC450-8 SE Spec. / PC450LC-8 SE Spec.

- A: Reach from swing center
- B: Bucket hook height
- C: Lifting capacity
- Cf: Rating over front
- Cs: Rating over side
- ☉: Rating at maximum reach

* Load is limited by hydraulic capacity rather than tipping. Ratings are based on SAE J1097. Rated loads do not exceed 87% of hydraulic lift capacity or 75% of tipping load.

STANDARD EQUIPMENT

ENGINE:

- Automatic engine warm-up system
- Corrosion resistor
- Dry type air cleaner, double element
- Engine, Komatsu SAA6D125E-5
- Engine overheat prevention system
- Fuel pre-filter (With water separator)
- Radiator and oil cooler dust proof net
- Water separator

ELECTRICAL SYSTEM:

- Alternator, 24 V/50 A
- Auto-decelerator
- Batteries, 2 X 12 V/110 Ah
- Working light, 2 (Boom and RH)

HYDRAULIC SYSTEM:

- Boom holding valve
- Long lubricating intervals for implement bushings
- Power maximizing system
- Pressure Proportional Control (PPC) hydraulic control system
- Two-mode setting for boom
- Working mode selection system

GUARDS AND COVERS:

- Fan guard structure
- Track roller guards (Full length)

UNDERCARRIAGE:

- Hydraulic track adjusters (Each side)
- Track roller
 - PC450-8, 7 each side
 - PC450LC-8, 8 each side

- Track shoe
 - PC450-8, 600 mm triple grouser
 - PC450LC-8, 600 mm triple grouser

OPERATOR ENVIRONMENT:

- Large multi-lingual LCD monitor
- Rear view mirrors (RH and LH)
- ROPS cab (ISO 12117-2)
- Seat belt, retractable

OTHER EQUIPMENT:

- Counterweight, 9220 kg
- Electric horn
- Rear reflector
- Slip-resistant plates
- Travel alarm

OPTIONAL EQUIPMENT

ELECTRICAL SYSTEM:

- Alternator, 24 V/60 A
- Batteries, 2 X 12 V/140 Ah
- Working lights (2 on cab)

HYDRAULIC SYSTEM:

- Attachment piping
- Long lubricating intervals for work equipment bushings
- Service valve

UNDERCARRIAGE:

- Shoes, triple grouser shoes
 - PC450-8, 700 mm
 - PC450LC-8, 700 mm
- Track frame undercover
- Variable track gauge

OPERATOR ENVIRONMENT:

- A/C with defroster
- Bolt-on top guard, OPG top guard level 2 (ISO 10262)
- Cab accessories
 - Rain visor
 - Sun visor
- Cab front guard
 - Full height guard, OPG level 1 (ISO 10262)
 - Full height guard, OPG level 2 (ISO 10262)
 - Half height guard
- Heater with defroster
- Rear view mirror (Rear and sidewise)
- Rear view monitor system
- Seat, suspension
- Seat, suspension with heater

WORK EQUIPMENT:

- Arms
 - 3380 mm arm assembly
 - 2400 mm SE arm assembly
- Booms (Backhoe)
 - 7060 mm boom assembly
 - 6670 mm SE boom assembly

OTHER EQUIPMENT:

- Electric grease gun
- Fuel refill pump
- Pre-cleaner
