# Crawler Excavator R 970 SME Super Mass Excavation

#### **Resized attachments**

- · Reinforced welded structure
- Larger kinematics components
- Integrated bottom stick protection as standard
- Additional protection available (bottom the boom and bucket cylinders)

#### **Increased productivity**

- HD bucket, up to 5 m³ for density of 1.8 t/m³
- Digging and breakout forces increased to over 15 %

#### **Robust undercarriage**

- Fitted with excavator components from the next size up machine
- Track pads with double grouser chamfered for improved manoeuvrability on rough terrain
- Cast sprocket wheel with double tooth segment for longer life
- Double sided bearings on carrier rollers for increased reliability and long-term durability
- Reinforced protection of travel drive for increased resistance against wear on hard and abrasive rock

#### Silent and comfortable cab

- To date, the largest and quietest cab in its category
- Mounted on visco-elastic elements to absorb vibrations
- Impact-resistant front window and roof window
- Pneumatic suspension seat, heated, multidirectional (air-conditioned optional)
- Large colour touch screen with high resolution display
- Elevated cab for improved visibility of loading area (option)

# Accessible and protected uppercarriage

- Left and right walkways as standard and large walkways with guardrails in option
- Platform with access to engine and hydraulic compartments for ergonomic and safe servicing
- Refined design for extended visibility
- New engine which conforms to Phase IV/Tier 4 final standards
- Heavy counterweight for enhanced stability and better performance

# Crawler Excavator R 970 SME Shovel Super Mass Excavation

#### **Attachments with no compromises**

- Cast steel components
- Parallel kinematics for powerful and constant penetration
- Bucket cylinders positioned under the attachments for better protection
- Safety valves for hose ruptures of boom cylinders

#### **Robust undercarriage**

- Fitted with excavator components from the next size up machine
- Track pads with 2 chamfered ribs for improved manoeuvrability on rough terrain
- Cast sprocket wheel with double tooth segment for longer life
- Dual-pivot carrier rollers for increased reliability and long-term durability
- Reinforced protection of travel drive for increased resistance against wear on hard and abrasive rock

**‡** Height □ Can be slewed though 360° Max. reach \* Limited by hydr. capacity The load values are quoted in tons (t) at stick end (without bucket), and may be swung 360° on firm and even ground. Adjacent values are valid for the undercarriage when in the longitudinal position. Capacities are valid for 600 mm wide track pads. Indicated loads are based on ISO 10567 standard and do not exceed 75 % of tipping or 87 % of hydraulic capacity (indicated via \*). Without bucket cylinder, link and lever the lift capacities will increase by 1,220 kg. Lifting capacity of the excavator is limited by machine stability and hydraulic capacity. According to European Standard, EN 474-5: In the European Union excavators have to be equipped with an overload warning device, a load diagram and automatic safety check valves on hoist cylinders and stick cylinder(s), when they are used for lifting operations which require the use of lifting accessories.
