Advanced/Classic

R 916 Litronic®

Operating Weight: 22,500 - 27,250 kg
Engine Output: 115 kW / 157 hp
Bucket Capacity: 0.95 - 1.55 m³

Performance

Thanks to its innovative Advanced excavator system technology, the R 916 Advanced crawler excavator has performance features that are truly unique. Characteristic elements of this system technology include the particularly effective and energy-efficient Positive Control twin-circuit hydraulic system, which was specifically designed for machines with a high level of superimposed functions and operational movements. The electronic pump control arrangement sets this technology apart, creating a new standard for performance and quantity control that entirely matches the operator's needs.

Reliability

Liebherr provides customers with solutions that lead the way for the future, solutions for maximum equipment reliability and availability, solutions which satisfy the most extreme demands for performance and quality. With more than 50 years experience in the construction of hydraulic excavators, we have an advantage in design and consultation that clearly sets us apart.

Comfort

In the cab the driver can look forward to a workplace designed in accordance with the very latest findings in ergonomic science, with emphasis on comfort and ease of operation. The optimised arrangement of the hydraulic hoses means that the driver has an even wider field of vision, and the heating and climate control system fitted as standard means pleasant working conditions inside, whatever the weather. Liebherr crawler excavators are also particularly easy to service – maintenance tasks can be carried out easily and rapidly at readily accessible service points.

Economy

Crawler excavators from Liebherr guarantee maximum productivity. The optimum interplay of hydraulics and electronics means that individual movements and superimposed movements alike can be carried out particularly efficiently. And, perhaps last but by no means least, the perfect harmonisation of all the components means that energy expenditure during operation can be kept to an absolute minimum.

Performance

Fig. R 916 Advanced

Thanks to its innovative Advanced excavator system technology, the R 916 Advanced crawler excavator has performance features that are truly unique. Characteristic elements of this system technology include the particularly effective and energy-efficient Positive Control twin-circuit hydraulic system, which was specifically designed for machines with a high level of superimposed functions and operational movements. The electronic pump control arrangement sets this technology apart, creating a new standard for performance and quantity control that entirely matches the operator's needs.

Advanced integrated excavator system technology

High-tech for high performance

Positive Control twin-circuit hydraulic system

Among the high-tech equipment on the Advanced version of the R 916 is the newly-developed integrated excavator system technology. This is based on the Positive Control hydraulic system, controlled by Liebherr electronics and the system software. The sensors located at strategic points on the machine form the basis for an intelligent system that allows for fast and fluent working.

When travelling straight or in a curve, and during levelling work, the two pump circuits of the hydraulic system are separated or grouped together, as the need arises. Separation of the systems means that different consuming components can be supplied with different load pressures independently, and saving energy too. By contrast, grouping the pump circuits allows for maximum speeds with individual or superimposed movements, and that means optimum energy utilisation.

Power and speed

Faster work cycles

Advanced operating pressure

Classic operating pressure

The R 916 achieves particularly fast work cycles, thanks, for example, to the powerful slewing drive of the superstructure, the rapid slewing rates, and the creation of high slewing torque.

With an operating pressure of 380 bar, the R 916 Advanced achieves higher hydraulically limited load capacities and higher digging forces, of up to 132 kN, and break-out forces of up to 179 kN; perfect for more difficult operational situations such as canal or pipeline construction.

An operating pressure of 365 bar makes the R 916 Classic fully equipped to tackle all earth moving work.

Wide range of operational possibilities

- Large number of equipment variants
- Versatile selection of undercarriage variants
- Broad operational spectrum, from earthmoving, to grading work, to demolition

Advanced / Classic

Powerful Liebherr engines

- Four-cylinder diesel engines developed and manufactured by Liebherr specifically for construction machines, with system integration by means of CANBus and pump line nozzle injection system
- Efficient power output, high degree of efficiency, and long service life
- High performance output from the unit already in the low revolution range makes a major contribution to the economical operation of the entire excavator

Advanced / Classic

Safe reliable transport

- Lashing eyes integrated into the undercarriage as standard make transport of the excavator both safe and reliable
- The lashing eyes are compatible with all conventional securing means and materials available on the market

Advanced / Classic

Reliability

Fig. R 916 Classic

Key technologies – Made by Liebherr

- Perfect matching of the components to construction machine operations
- Engine, hydraulic pumps, transfer gears, travel drives, slewing drives, slewing rings, and electronic components – all from the same source
- Main steel components, such as undercarriage, equipment modules, and slewing superstructure, all designed by Liebherr

Advanced / Classic

Spare parts service

- Any spare parts required are available within 24 hours – worldwide. And that means high operational readiness of the machines, wherever, whenever
- Over 80,000 spare parts in stock at all times

Classic

Classic cab

- Best possible view thanks to large-scale windows
- Driver's seat can be individually adjusted and is vibration-damped
- Automatic heating/climate control as standard
- Right-hand pane without middle bar
- Closed stowage space
- Front, roof, and side window panes made of laminated safety glass
- Integrated roll-over protection system (ROPS)

Advanced

Comfort

Advanced

In the cab the driver can look forward to a workplace designed in accordance with the very latest findings in ergonomic science, with the emphasis on comfort and ease of operation. The optimised arrangement of the hydraulic hoses means that the driver has an even wider field of vision, and the heating and climate control system fitted as standard means pleasant working conditions inside, whatever the weather. Liebherr crawler excavators are also particularly easy to service – maintenance tasks can be carried out easily and rapidly at readily accessible service points.

Safe work – with a clear layout

A pleasant workplace

The entirely new design of the Advanced cab provides plenty of room, and creates a pleasant sense of space. Cab windows in the front, the roof, and on the right are made of break-resistant two-pane safety glass. The front windscreen is a two-part design and can be completely retracted. The cab meets ROPS requirements, providing the driver with even more protection.

High-resolution colour display

The 7-inch high-resolution colour display can be operated optionally as a touch-screen system or rotating/pushbutton arrangement. Thanks to its high resolution, the video-style display reproduces the image from the rear area monitoring camera in the best possible quality. It comes with versatile adjustment, control, and monitoring capabilities, and is designed to be glare-free.

Wide camera viewing field

The optional rearview camera for the R 916 Advanced, with a viewing angle of more than 120°, provides a complete view of the area behind the machine.

Fully automatic climate control system

The climate control system has more than 12 adjustable nozzles for individual control of air flow, and can be operated via the display. For heating operation, the fuel-saving Econ mode is available, in which the climate control compressor is switched off.

Minimal noise and vibration

The new cab on the Liebherr crawler excavator meets the standards for noise emissions and whole-body vibrations, which makes work a pleasure.

Fig. R 916 Advanced

Advanced cab

In addition to the equipment features of the Classic cab:

- Newly developed driver's position as standard
- Air-suspension seat with automatic weight adjustment and horizontal suspension for maximum comfort – as standard
- For optimum ease of operation and fatigue-free working, the operating consoles pivot with the seat

Advanced / Classic

Extremely maintenance-friendly

- All maintenance points are easily accessible
- Daily routine servicing work can be carried out very rapidly, reliably, and in comfort
- The Advanced version comes as standard with a fully-automatic central lubrication system, and the Classic with a semi-automatic arrangement

Advanced / Classic

Liebherr Tool Control

- Memory storage of up to ten tool settings (pressure and oil flow)
- Display of the designation of the add-on attachments and tools
- If the hydraulic attachment is changed, once the new tool has been chosen the system presents the programmed pressure values and oil flow volumes in the menu

Advanced / Classic

Economical

Fig. R 916 Advanced

Crawler excavators from Liebherr guarantee maximum productivity. The optimum interplay of hydraulics and electronics means that individual movements and superimposed movements alike can be carried out particularly efficiently. And, perhaps last but by no means least, the perfect harmonisation of all the components means that energy expenditure during operation can be kept to an absolute minimum.

Economical technology

Costs savings thanks to fuel efficiency

Classic

Tests have shown that the new crawler excavators from Liebherr use even less fuel than the units of the previous generation. The electronic engine speed sensing control creates efficient conversion of engine output into hydraulic performance. The result: Faster and more powerful working while cutting fuel consumption at the same time; which means less stress for the diesel engine, too.

Advanced

The Advanced crawler excavator is even more economical when it comes to fuel consumption. Fuel savings are achieved thanks to the integrated excavator system technology and the efficient engine and hydraulics management. When at rest, the sensor-controlled function automatically brings the engine revolution speed down to idling, which reduces fuel consumption and emission values, and helps save the environment - as well as costs.

Value retention

High resale value

Liebherr excavators are built to last, with top quality materials given top quality workmanship – and that guarantees top value retention.

Environmental protection and recycling

All Liebherr engines meet the exhaust gas directives specified by law, of Stage IIIA/ Tier 3, which means reduced nitrogen oxide and fine dust emissions. This effect is supported even further by the optionally available Liebherr particle filter. With Liebherr, concern for the environment is extended to the whole machine. Up to 95 % of all the components from a Liebherr excavator can be recycled, and only lead-free paints are used.

Innovative tooth system

- Patented tooth system, consisting of tooth holder, tooth, securing bolts, and protective plugs
- Teeth can be replaced rapidly and without the use of force
- Tooth shapes for every operational situation

Advanced / Classic

Modular particle filter (optional)

- Reduction in fine dust emissions
- Consists of intake, filter, outlet, and muffler modules
- Certified in accordance with the VERT filter list

Technical Data

Advanced

Engine

Rating per ISO 9249	115 kW (157 HP) at 1,800 RPM
Model	Liebherr D 934 S
Type	4 cylinder in-line
Bore/Stroke	122/136 mm
Displacement	6.36 l
Engine operation	4-stroke diesel unit pump system turbo-charged after-cooled and fuel cooled reduced emissions
Cooling	water-cooled and integrated motor oil cooler
Air cleaner	dry-type air cleaner with pre-cleaner, primary and safety elements
Fuel tank	380 l
Electrical system	Voltage 24 V Batteries 2 x 135 Ah/12 V Starter 24 V/6.6 kW Alternator three phase current 28 V/80 A Engine idling sensor-controlled
Integrated motor management	Advanced connection to the integrated bagger system controlling via CAN-BUS to the economical utilisation of the service that is available

Swing Drive

Advanced	shockless and antireaction
Drive by	Liebherr swash plate motor
Transmission	Liebherr compact planetary reduction gear
Swing ring	Liebherr, sealed single race ball bearing swing ring, internal teeth
Swing speed	0 – 11 RPM stepless
Swing torque	71.1 kNm
Holding brake	wet multi-disc (spring applied, pressure released)

Operator's Cab

Cab	ROPS safety cab structure (capable of sweeping over) with individual windscreens or featuring a slide-in subpart under the ceiling, work headlights integrated in the ceiling, a door with a side window (can be opened on both sides), large stowing and depositing possibilities, shock-absorbing suspension, sounddamping insulating, tinted laminated safety glass, separate window shades for the sunroof window and windscreens Liebherr-Air-Comfort seat, air sprung with automatic weight adjustment, vertical and horizontal seat damping including consoles and joysticks. Seat and armrests adjustable separately and in combination, seat heating as standard arm consoles, swinging with the seat large high resolution colour display with self-explanatory operation via touch screen or turn-push button, video capability, versatile adjusting, control and monitoring facilities, e.g. climate control, implement and tool parameters
Operator's seat	Liebherr-Air-Comfort seat, air sprung with automatic weight adjustment, vertical and horizontal seat damping including consoles and joysticks. Seat and armrests adjustable separately and in combination, seat heating as standard arm consoles, swinging with the seat large high resolution colour display with self-explanatory operation via touch screen or turn-push button, video capability, versatile adjusting, control and monitoring facilities, e.g. climate control, implement and tool parameters
Control system	arm consoles, swinging with the seat large high resolution colour display with self-explanatory operation via touch screen or turn-push button, video capability, versatile adjusting, control and monitoring facilities, e.g. climate control, implement and tool parameters
Operation and displays	large high resolution colour display with self-explanatory operation via touch screen or turn-push button, video capability, versatile adjusting, control and monitoring facilities, e.g. climate control, implement and tool parameters
Air-conditioning	standard automatic air-conditioning, ambient air function, fast de-icing and demisting at the press of a button, air vents can be operated via a menu; ambient air and fresh air filters can be easily replaced and are accessible from the outside; heating-cooling unit, designed for extreme outside temperatures, sensors for solar radiation, inside and outside temperatures
Noise emission	
ISO 6396	L_{PA} (inside cab) = 72 dB(A)
2000/14/EC	L_{WA} (surround noise) = 102 dB(A)

Undercarriage

Versions	
NLC	gauge (2,000 mm)
SLC	gauge (2,250 mm)
LC	standard gauge (2,380 mm)
WLC	gauge (2,590 mm)
Drive	Liebherr swash plate motors with integrated brake valves on both sides
Transmission	Liebherr planetary reduction gears
Travel speed	low range – 3.7 km/h high range – 6.1 km/h
Net drawbar pull on crawler	199 kN
Track components	B 60, maintenance-free
Track rollers/Carrier rollers	NLC/SLC/LC: 8/2 WLC: 9/2
Tracks	sealed and greased
Track pads	triple-grouser
Digging locks	wet multi-discs (spring applied, pressure released)
Brake valves	integrated into travel motor
Lashing eyes	integrated

Attachment

Type	combination of resistant steel plates and cast steels components
Hydraulic cylinders	Liebherr cylinders with special seal-system, shock absorbed
Pivots	sealed, low maintenance
Lubrication	automatic central lubrication system (except link and tilt geometry)
Hydraulic connections	pipes and hoses equipped with SAE splitflange connections
Bucket	fitted as standard with Liebherr tooth system

Hydraulic System

Hydraulic system	Positive Control Advanced. Dual circuit hydraulic system for independent and need-based quantity allotment via the hydraulic pumps; sensor-guided. Features high system dynamics and sensibility provided by integrated system controlling
Hydraulic pump	Liebherr variable displacement pump built in transversal plate style, in parallel arrangement with integrated transfer box
Max. flow	2 x 214 l/min.
Max. pressure	380 bar
Pump management	electronic pump management via the integrated system controlling (CAN-BUS) synchronous to the control block
Hydraulic tank	290 l
Hydraulic system	max. 500 l
Hydraulic oil filter	1 full flow filter (20 µm) in return line with integrated fine filter area (5 µm)
Hydraulic oil cooler	compact cooler, consisting of a water cooler, sandwiched with hydraulic oil cooler, fuel cooler and after-cooler cores and hydrostatically driven fan
MODE selection	adjustment of engine and hydraulic performance via a mode pre-selector to match application, e.g. for especially economical and environmentally friendly operation or for maximum digging performance and heavy-duty jobs
RPM adjustment	stepless adjustment of engine output via RPM at each selected mode
Liebherr Tool Control	10 preadjustable pump flows and pressures for add-on tools

Hydraulic Controls

The controlling is conducted via the integrated bagger system technology, input and output modules, communicated via the CAN-BUS with the electronic central unit.
Power distribution via control valve with integrated safety valves
Servo circuit
Attachment and swing proportional via joystick levers
Travel – with proportionally functioning foot pedals or adjusted with a plugable lever – speed pre-selection
Additional functions proportional regulation via slide switches or foot pedals

Advanced

The lift capacities on the load hook of the Liebherr quick change adapter 48 without attachment are stated in metric tonnes (t), and can be lifted 360° on firm, level supporting surface. Adjacent values are valid for the undercarriage when in the longitudinal position. Capacities are valid for 600 mm wide triple-grouser pads. Indicated loads are based on ISO 10567 standard and do not exceed 75 % of tipping or 87 % of hydraulic capacity (indicated by *) or are limited through the allowed lift capacity of the load hook on the quick change adapter (12 t). Without quick change adapter the lift capacities will increase by 250 kg, without bucket cylinder, link and lever they increase by an additional 370 kg.

According to European Standard, EN 474-5: In the European Union excavators have to be equipped with an overload warning device, a load diagram and automatic check valves on the hoist cylinders, when they are used for lifting operations which require the use of lifting accessories.

¹⁾ Values are calculated with 500 mm wide triple-grouser pads for the NLC-Undercarriage

* Limited by hydr. capacity

The lift capacities on the load hook of the Liebherr quick change adapter 48 without attachment are stated in metric tonnes (t), and can be lifted 360° on firm, level supporting surface. Adjacent values are valid for the undercarriage when in the longitudinal position. Capacities are valid for 600 mm wide triple-grouser pads. Indicated loads are based on ISO 10567 standard and do not exceed 75 % of tipping or 87 % of hydraulic capacity (indicated by *) or are limited through the allowed lift capacity of the load hook on the quick change adapter (12 t). Without quick change adapter the lift capacities will increase by 250 kg, without bucket cylinder, link and lever they increase by an additional 370 kg.

According to European Standard, EN 474-5: In the European Union excavators have to be equipped with an overload warning device, a load diagram and automatic check valves on the hoist cylinders, when they are used for lifting operations which require the use of lifting accessories.

¹⁾ Values are calculated with 500 mm wide triple-grouser pads for the NLC-Undercarriage

Backhoe Attachment Advanced

with Hydr. Adjustable Main Boom 4.00 m

Advanced

Optional: heavy duty counterweight

(Heavy duty counterweight increases the operating weight by 1,000 kg and ground pressure by 0.02 kg/cm²)

Height Can be slewed through 360°

In longitudinal position of undercarriage

Max reach

Max reach * Limited by hydr. capacity

The lift capacities on the load hook of the Liebherr quick change adapter 48 without attachment are stated in metric tonnes (t), and can be lifted 360° on firm, level supporting surface. Adjacent values are valid for the undercarriage when in the longitudinal position. Capacities are valid for 600 mm wide triple-grouser pads. Indicated loads are based on ISO 10567 standard and do not exceed 75 % of tipping or 87 % of hydraulic capacity (indicated by *) or are limited through the allowed lift capacity of the load hook on the quick change adapter (12 t). Without quick change adapter the lift capacities will increase by 250 kg, without bucket cylinder, link and lever they increase by an additional 370 kg.

According to European Standard, EN 474-5: In the European Union excavators have to be equipped with an overload warning device, a load diagram and automatic check valves on the hoist cylinders, when they are used for lifting operations which require the use of lifting accessories.

1) Values are calculated with 500 mm wide triple-grouser pads and heavy counterweight for the NLC-Undercarriage

Can be slewed through 360°

In longitudinal position of undercarriage

Max. reach

* Limited by hydr. capacity

The lift capacities on the load hook of the Liebherr quick change adapter 48 without attachment are stated in metric tonnes (t), and can be lifted 360° on firm, level supporting surface. Adjacent values are valid for the undercarriage when in the longitudinal position. Capacities are valid for 600 mm wide triple-grouser pads. Indicated loads are based on ISO 10567 standard and do not exceed 75 % of tipping or 87 % of hydraulic capacity (indicated by *) or are limited through the allowed lift capacity of the load hook on the quick change adapter (12 t). Without quick change adapter the lift capacities will increase by 250 kg, without bucket cylinder, link and lever they increase by an additional 370 kg.

According to European Standard, EN 474-5: In the European Union excavators have to be equipped with an overload warning device, a load diagram and automatic check valves on the hoist cylinders, when they are used for lifting operations which require the use of lifting accessories.

¹⁾ Values are calculated with 500 mm wide triple-grouser pads and heavy counterweight for the NLC-Undercarriage

Can be slewed through 360°

In longitudinal position of undercarriage

Max. reach

* Limited by hydr. capacity

The lift capacities on the load hook of the Liebherr quick change adapter 48 without attachment are stated in metric tonnes (t), and can be lifted 360° on firm, level supporting surface. Adjacent values are valid for the undercarriage when in the longitudinal position. Capacities are valid for 600 mm wide triple-grouser pads. Indicated loads are based on ISO 10567 standard and do not exceed 75 % of tipping or 87 % of hydraulic capacity (indicated by *) or are limited through the allowed lift capacity of the load hook on the quick change adapter (12 t). Without quick change adapter the lift capacities will increase by 250 kg, without bucket cylinder, link and lever they increase by an additional 370 kg.

According to European Standard, EN 474-5: In the European Union excavators have to be equipped with an overload warning device, a load diagram and automatic check valves on the hoist cylinders, when they are used for lifting operations which require the use of lifting accessories.

¹⁾ Values are calculated with 500 mm wide triple-grouser pads for the NLC-Undercarriage

Backhoe Attachment

Can be slewed through 360°

In longitudinal position of undercarriage

Max. reach

* Limited by hydr. capacity

The lift capacities on the load hook of the Liebherr quick change adapter 48 without attachment are stated in metric tonnes (t), and can be lifted 360° on firm, level supporting surface. Adjacent values are valid for the undercarriage when in the longitudinal position. Capacities are valid for 600 mm wide triple-grouser pads with adjusting cylinder in optimal position. Indicated loads are based on ISO 10567 standard and do not exceed 75 % of tipping or 87 % of hydraulic capacity (indicated by *) or are limited through the allowed lift capacity of the load hook on the quick change adapter (12 t). Without quick change adapter the lift capacities will increase by 250 kg, without bucket cylinder, link and lever they increase by an additional 370 kg.

According to European Standard, EN 474-5: In the European Union excavators have to be equipped with an overload warning device, a load diagram and automatic check valves on the hoist cylinders, when they are used for lifting operations which require the use of lifting accessories.

¹⁾ Values are calculated with 500 mm wide triple-grouser pads and heavy counterweight for the NLC-Undercarriage

Standard Equipment Advanced/Classic

Undercarriage

	Advanced	Classic
Lifetime-lubricated track rollers	•	•
Tracks sealed and greased	•	•
Track guide at each track frame	•	•
Sprocket with dirt ejector	•	•
Lashing eyes	•	•
Two-stage travel motors	•	•

Uppercarriage

	Advanced	Classic
Handrails, non slip surfaces	•	•
Engine hood with lift help	•	•
Sound insulation	•	•
Maintenance-free swing brake lock	•	•
Maintenance-free HD-batteries	•	•
Lockable tool box	•	•
Tool kit	•	•

Hydraulics

	Advanced	Classic
Hydraulic tank shut-off valve and pumps	•	•
Pressure test ports for hydraulic	•	•
Pressure storage for controlled lowering of equipment with engine turned off	•	•
Electronic pump regulation	•	•
Filter with integrated fine filter area (5 µm)	•	•
Stepless work mode selector	•	•
Positive Control Advanced	•	
Positive Control Classic		•
Regeneration Plus function on hydraulic circuit	•	•
Electronic control logic	•	
Hydraulic control logic		•

Engine

	Advanced	Classic
Turbo charger	•	•
Conform with level IIIA/Tier 3 emission standard	•	•
After-cooled	•	•
Unit pump system injection	•	•
Sensor controlled engine idling	•	•
Dry-type air cleaner w/pre-cleaner, main and safety element	•	•

Operator's Cab

	Advanced	Classic
Storage bin	•	•
Mechanical hour meters, readable from outside the cab	•	•
Sunroof, right window and windshield with safety glass	•	•
Seat with mechanical suspension		•
Control cab Advanced	•	
Completely retractable windscreens	•	
Front windscreens (bottom) retractable	•	
Closed storage space	•	•
Rubber floor mat	•	•
Dome light	•	•
Coat hook	•	•
Automatic air conditioning Classic		•
Automatic air conditioning Advanced	•	
Fuel consumption indicator	•	
Liebherr-Air-Comfort seat heated with air-suspension	•	
Multifunction display		•
7" colour multifunction display with touchscreen	•	
Emergency exit rear window	•	•
Preparation for radio installation	•	•
Right window made of one piece (without post)	•	•
Rain hood over front window opening	•	•
All tinted windows	•	•
Door with sliding window	•	•
Height-adjustable operating console	•	
Seat belt	•	•
Sun roller blind	•	•
Load bearing sectional profile structure, covered with deep-drawn panels	•	•
Wiper/washer	•	•
Cigarette lighter and ashtray	•	•
Two flood lights under rain hood	•	•

Attachment

	Advanced	Classic
Two separate bearings for hoist cylinder with casted parts	•	
12 t lifting hook with safety link on quick-coupler	•	•
Liebherr semi-automatic central lubrication system (except connecting link for bucket kinematics)		•
Liebherr full-automatic central lubrication system (except connecting link for bucket kinematics)	•	
Additional work light on boom (right)	•	•
Cylinders with shock absorbers	•	•

• = Standard

Individual Options Advanced/Classic

Undercarriage

	Advanced	Classic
Wide step	+	+
Reinforced base panel	+	+
Reinforced cover and base panel	+	+
Three-piece track guide	+	+
Straight track guide	+	+
D6C conversion kit with 3-piece track guide	+	+
Tractive force increase	+	+
NLC-Undercarriage	+	+
SLC-Undercarriage	+	+
LC-Undercarriage	+	+
WLC-Undercarriage	+	+

Operator's Cab

	Advanced	Classic
Fire extinguisher	+	+
Lower windscreens with wiper	-	+
Foot support	+	+
Electric cool box	+	+
Cab with bullet-proof glass (front and roof windows) and roof window wipers	+	+
LIDAT Standard (Liebherr data transfer system)	+	+
LIDAT Plus (extended Liebherr data transfer system)	+	+
Air pressure operator seat	•	+
Premium operator seat	+	-
Engine shut-down (via push-button) in cab	+	+
Bullet-proof roof glass panel with wiper	+	+
Radio with SD-/MMC-card, Aux-in	+	+
Rear space monitoring with camera	+	+
Beacon	+	+
Wiper for sunroof	+	+
Xenon headlights	+	+
Protective grid up FOPS	+	+
Protective grid front FGPS	+	+
Sun visor	+	+
Roof sun screen	+	+
Auxiliary heating with clock timer	+	+
Change over controls for clamshell bucket/grapple	+	+
Electronic drive away lock	+	+
Additional halogen headlights behind cab	+	+
Additional halogen headlights front cab	+	+

Advanced / Classic

Uppercarriage

	Advanced	Classic
Heavy counterweight	+	+
Electric refuel pump	+	+
Reversible fan drive	+	+
Positioning slewing brake	-	+
Customized colors	+	+
Extended tool kit	+	+

Hydraulics

	Advanced	Classic
Add-on kit rotary drive (including routing)	+	+
Bio-degradable hydr. oil	+	+
Grapple operation (including routing)	+	+
Liebherr proportional control system	+	+
Liebherr Tool Control	+	+
Bypass filter	+	+
Return filter for hammer	+	+

Engine

	Advanced	Classic
Fuel pre-heating	+	+
Liebherr particle filter	+	+
Air pre-filter with dust trap	+	+
Automatic engine shut-down (adjustable time-period)	+	+

Attachment

	Advanced	Classic
Adjustable boom	+	+
Adjustable offset boom	+	-
Hoist cylinder depth limitation	+	+
Security for hoist cylinders	+	+
Piston rod cover bucket cylinder	+	+
12 t lifting hook on bucket	+	+
Liebherr semi-automatic central lubrication system (except connecting link for bucket kinematics)	-	•
Liebherr full-automatic central lubrication system (except connecting link for bucket kinematics)	•	+
Likufix	+	+
Liebherr line of buckets	+	+
Straight gooseneck boom	+	+
Safety check valves hoist cylinder	+	+
Safety check valves stick cylinder	+	+
Hose-protecting lubrication system (stick rear)	+	+
Hydr. or mechanical quick change coupler	+	+
Overload warning device	+	+
Central lubrication of the connecting link for bucket kinematics	+	+
Working headlight on boom (left)	+	+

• = Standard, + = Option, - = not available

Option Packages Advanced/Classic

	Advanced	Classic	Advanced	Classic
Anti-Theft Package	+	+		
Electronic drive away lock				
Fuel anti-theft device				
Lighting Package	+	+		
Headlights on cab (Xenon, 2 pieces)				
Additional rear headlights on cab (2 pieces)				
Travel-Safety Package	+	+		
Add-on exterior mirror right				
Beacon				
Travel-Safety Package Plus	+	+		
Travel alarm system in right joystick (switchable)				
Add-on exterior mirror right				
Beacon				
Add-On Package – Hammer Classic	-	+		
Security for hoist cylinder for hammer operation				
Return filter for hammer				
Add-On Package – Hammer Advanced	+	-		
Security for hoist cylinder in grab or hammer operation (switchable)				
Return filter for hammer				
Add-On Plus Package – Hammer Classic	-	+		
Cab with bullet-proof glass (front and roof windows) and roof window wipers				
Security for hoist cylinder for hammer operation				
Return filter for hammer				
Add-On Plus Package – Hammer Advanced				
Cab with bullet-proof glass (front and roof windows) and roof window wipers				
Security for hoist cylinder in grab or hammer operation (switchable)				
Return filter for hammer				
Heavy Duty Package Classic			-	+
Protection for stick				
3-piece track guide				
Heavy Duty Package Advanced			+	-
Protection for stick				
Piston rod guard for bucket cylinder				
Reinforced base panel				
Cab with bullet-proof glass (front and roof windows) and roof window wipers				
Three-piece track guide				
Heavy Duty Package Plus Advanced			+	-
Protection for stick				
Piston rod cover bucket cylinder				
D6C conversion kit with 3-piece track guide				
Reinforced base panel				
Cab with bullet-proof glass (front and roof windows) and roof window wipers				
Protective grid up FOPS				
Protective grid front FGPS

Option Packages Advanced/Classic

	Advanced	Classic	Advanced	Classic	Advanced	Classic
Cold Climate Start Package	+	+				
Auxiliary heater with weekly timer						
Fuel pre-heating						
Comfort Package	+	+				
Extended tool equipment						
Radio with SD-/MMC-card, Aux-in						
Electric cool box						
Comfort Package Plus Classic	-	+				
Extended tool equipment						
Radio with SD-/MMC-card, Aux-in						
Electric cool box						
Air pressure operator seat						
Sun visor						
Foot support						
Comfort Package Plus Advanced	+	-				
Extended tool equipment						
Radio with SD-/MMC-card, Aux-in						
Electric cool box						
Premium operator seat						
Sun visor						
Foot support						
Add-On Light Package			+	+		
2 additional rear headlights on cab						
Additional working headlights on boom						
Add-On Light Package Plus			+	+		
2 additional headlights on cab						
2 additional rear headlights on cab						
1 additional working headlights on boom						
EU Lift Capacity Package			+	+		
Apave Europe						
Hoist cylinder load holding valves						
Lift capacity table						
Overload warning device						
Adjustable Boom Package			+	-		
Adjustable attachment						
Hoist limitation in depth

The Liebherr Group of Companies

Wide product range

The Liebherr Group is one of the largest construction equipment manufacturers in the world. Liebherr's high-value products and services enjoy a high reputation in many other fields, too. The wide range includes domestic appliances, aerospace and transportation systems, machine tools and maritime cranes.

Exceptional customer benefit

Every product line provides a complete range of models in many different versions. With both their technical excellence and acknowledged quality, Liebherr products offer a maximum of customer benefits in practical application.

State-of-the-art technology

To provide consistent, top quality products, Liebherr attaches great importance to each product area, its components and core technologies. Important modules and components are developed and manufactured in-house, for instance the entire drive and control technology for construction equipment.

Worldwide and independent

Hans Liebherr founded the Liebherr family company in 1949. Since that time, the enterprise has steadily grown to a group of more than 100 companies with over 32,000 employees located on all continents. The corporate headquarters of the Group is Liebherr-International AG in Bulle, Switzerland. The Liebherr family is the sole owner of the company.
